

Community led initiatives in supporting ageing and dementia research

Professor Charles Musselwhite
Head of Psychology, Aberystwyth University,

Co-Director Centre for Ageing and Dementia Research

Swansea, Aberystwyth and Bangor Universities

Twitter: @CadrProgramme

Website: www.cadr.cymru

CADR aims to improve the lives of older people through the integration of research on ageing, policy and practice

Environments Of Ageing (ECO)

Dementia and continence issues at home

Rare dementia care needs and support

Age friendly and dementia supportive environments

Health and social care environments

Environmental influences on social relations

> Fuel poverty and solar energy

0

Characterising Dementia and **Cognition in** Ageing (BIO)

- Characterising dementia · Subjective cognitive decline ·
- Visual attention and cognitive impairment ·

Visual attention

and falls

Physical environmental influences on the

experiences of dementia

Social Inclusion For Health **And Wellbeing** (PSYCHO-SOCIAL)

- · Social and cultural exclusion
- Social relations
- Work
- · Kin and non-kin carers
- Public and private services
- Resilience and socio-emotional processes

Visual attention and the influence on social relations

- · Health and social care innovation and interventions (creative methods. intergenerational activities)
- · Professional engagement and involvement (Social Care Innovation Lab; ENRICH Cymru, My Home Life Cymru; Institute of Creative Ageing Industries)

Resilience and rare dementias

· Public engagement and involvement (co-production, Join Dementia Research)

Infrastructure

We have 2 **living labs** in Wales:

- Smart Home Lab in Aberystwyth Uni
- Awen institute, Swansea Uni mock-up of home and a meeting space

Labs -

Experimental - auditory, driving simulator, EEG, eye tracking.

But also out on the road!

What this allows us to do...

sunise

Research aim

To provide a deeper contextual understanding of a Renewable Energy transition.

Methods

Used Participatory Video with Most Significant Change to gather villagers perspective of a new solar community building in Khuded, Maharashtr, India, (population 500/80 families)

Changes in everyday lives and activities

- 1. Reducing time spent on everyday activities eg rice husking and grinding (empowering)
- 2.**Economic opportunities**: Cash crops (jasmine) and social enterprise opportunities (bamboo crafts)
- 3.**Health** eg diabetes and haemoglobin testing Including public health
- 4. Wellbeing (inc. social and cultural activities)
- 5. Educational opportunities (particularly if Wifi available)
- 6. Public space with consistent lighting
- 7. Recommendations for the future made

ACTIVE BUILDING CENTRE RESEARCH PROGRAMME

- Older people different energy use
- Older housing difficult to retrofit
- Hassle of retrofitting
- New technology not intuitive to use
- Different engagement with technology
- Felt done to, rather than done with (esp in social renting sector)
- Tech didn't fit daily lives, norms and expectations.
- Care homes very different energy use
 So,
- Important to bring people along
- Have demonstrators

Projects & Centres

What makes a rural community in Wales?

Community works when

- Infrastructure capital
 - (somewhere to go, services, shops, leisure)
 - Fostered by
- Social capital
 - (people, sharing skills, knowledge)
 - Underpinned by:
- Culture
 - (Need to involve and understand rural needs, uniqueness of rurality, innovation, demonstrations. Planning with communities)
 - and
- Individual capital (own health, skills, abilities)
- Where communication is key (especially in the infrastructure and the social capital elements)

Cultural capital (expectations, norms, laws, rules)

Infrastructure capita

Transport

Centrality of Accessibility and Mobility

Experiences of facilities and services

Experiences and perceptions around healthcare Social capital

Feelings and factors around isolation

Social relationships

Communication within the community

Individual capital (health, wellbeing, skills, abilities)

Understanding Older and younger people's PerspecTives and Imaginaries of Climate change (OPTIC): emplaced creativity to improve environments for healthy ageing

Hearing Loss and Place (HELP)

Project in brief

Many people as they age report difficulty hearing in certain noisy environments such as in retail on public transport even when they wear a hearing aid, leading to reluctance to go to some places. This effects health and wellbeing.

Achievements

- Cognitive Insights: Improved understanding of how noise affects cognition.
- Community Videos: Created videos highlighting issues faced by those with hearing loss.
- Guidelines: Developed guidelines with older adults, businesses, and researchers to improve environments in retail, hospitality, and transport.
- Hearing Insights: Gained understanding of subjective hearing experiences in noisy settings.
- Research Evidence: Enhanced evidence to guide changes for older adults with hearing loss.

Collaborations:

- Audiology department at Aberystwyth University
- Boots
- Marks & Spencer (M&S)

Impact and engagement Research into action

CADR has older people at the heart of what we do:

Database of over 1300 organisations, groups and people

Then specific groups

- Involvement and engagement group help set our research agendas and pathways
- Lay experts' group help make our information is relevant and can be understood by older people
- Join Dementia Research matches volunteers interested in taking part in dementia research with researchers looking for potential participants.
- Project specific steering groups
- Work with policy and practice to deliver

Impact and engagement
Research into action

Transport and mobility

Older Drivers: After the Wheels Stop Turning

After the Wheels Stop Turning Campaign

Dr Amy Murray, Swansea University

Data from older people and their families, local authorities, and voluntary organisations. They want

- significant improvements to public transport,
- door-to-door transport service,
- and an infographic booklet providing advice and guidance.

Developing a 'one stop' type of webpage.

- Existing web resources being reviewed including
 - https://olderdriversforum.com/ (UK),
 - Canada's https://www.drivinganddementia.ca/ and
 - Queensland Uni Australia's https://carfreeme.com.au/

The final goal will be to design and roll out a **co-produced intervention** for driving cessation in Wales. Workshop to **co-develop website and identify tailored support**. Followed by using the findings to develop a 'one-stop' webpage. The website would be comprehensive, by bringing together examples of best practice on a global level.

Seminars and Annual conference

A Decade of Impact: Transforming Ageing and Dementia Research. Join us on Thursday, 14th November 2024, at the Radisson Blu Hotel, Cardiff

Covered a range of topics:

- Language,
- Transportation,
- Cognitive Impairments,
- Work, Health and Retirement and
- Loneliness and Isolation.

Where next?

We can't solve problems or see the wonderful asset that ageing is if we don't work together

But...CADR funding is coming to an end after 10 years.

So where next for research on ageing in Wales What we've done well:

- Brings different places together: Though we'd like more rural activity.
- Brings different sectors together: Though we'd like to support more supporting what local third sector/charities
- Brings different disciplines together
- Brings real life into what we do: Involvement and engagement
- New research
- Research onto other people's agenda
- Impact on policy and practice

Strategy

- Make a difference but where do we place our effort going forwards?
- What are current key themes, issues in policy and practice?
- What is missing in our research?
