- 1.1 The Ceredigion Local Development Plan 2007 2022 was formally adopted by Ceredigion County Council on 25th April 2013. This is the 10th Annual Monitoring Report and covers the period 1st April 2022 31st March 2023 with referrals to earlier parts of the plan period where indicators dictate this to be necessary. The AMR is the main mechanism for reviewing the relevance and success of the LDP and identifying any changes necessary from established trends identified. It seeks to assess the extent to which the LDP strategies, policies and key sites are being delivered.
- 1.2 This is the first AMR outside of the statutory plan period. The plan has no formal drop-dead date and following the Council's decision to formally pause replacement plan preparation in October 2021, will remain the plan in place until a replacement plan is adopted.
- 1.3 Whilst the plan remains in place the AMR will continue to be undertaken, however it's important to note the further we move from adoption the less relevant the housing targets and employment land targets become. Especially given, the household projections on which the plan was predicated. In that they predicted population growth, however Ceredigion has seen the largest decline in population in Wales in the intercensal period 2011 and 2021 with decline of 5.8%. The housing requirement of 400 units a year is not what we recognise now as an appropriate housing target for Ceredigion, with approximately 200 units a year being more appropriate. That being said the AMR recognises that in many cases (outside of the housing targets) the LDP continues to function well and there are no major concerns over policy implementation.
- 1.4 The Monitoring framework for this AMR forms part of the adopted LDP. Consideration has been given to The Town and Country Planning (Local Development Plan) (Wales) Regulations (2005) (Regulation 37) and core indicators identified in the Local Development Plan Manual, Edition 2 (August 2015) and Edition 3 (March 2020). Subsequent changes to the LDP monitoring framework are provided in Appendix 1 where relevant.

- 1.5 Monitoring the LDP also accords with the requirements for monitoring the sustainability performance of the plan through the Strategic Environmental Assessment / Sustainability Appraisal (SEA/SA) monitoring framework. Section 5 of this report includes monitoring the SA/SEA for the period 1st April 2022 31st March 2023. It is considered that any issues of concern which have arisen during the monitoring period to materially change the Sustainability Appraisal will be taken into account in the Sustainability Appraisal of the replacement LDP at such time as this is prepared.
- 1.6 A Review of the adopted LDP has been undertaken and the report recommended a full replacement Plan is prepared. The Delivery Agreement for the replacement LDP was confirmed in June 2018.
- 1.7 The Review Report and Delivery Agreement are available on the Council's website.

Review Report: http://www.ceredigion.gov.uk/media/6187/ceredigion-ldp-2007-2022-review-report-eng.pdf

Delivery Agreement: http://www.ceredigion.gov.uk/media/6189/2018-06-22-wg-agreed-da-eng.pdf

- 1.8 In terms of progress with the replacement LDP, the Council consulted on its Preferred Strategy and undertook a further Call for Candidate Sites between June-September 2019. As a result of consultation responses to the Preferred Strategy changes were made to the Delivery Agreement that were signed off by the Minister for Housing Julie James on 19th March 2020. However due to the global COVID-19 Pandemic under advice from the Chief Planner on 18th March 2020 that under those circumstances no formal public consultations should be undertaken and LDP teams should focus temporarily on technical and background evidence base work formal replacement plan stages were suspended.
- 1.9 Furthermore, in January 2021 NRW released Interim Planning Guidance regarding the phosphate levels in riverine SACs in Wales (updated in 2023) which affects Ceredigion due to the River Teifi SAC accounting for 45% of land area of the county and encompassing 3 of the 6 main settlements (USCs), work on the LDP has not progressed as solutions and mitigations to enable planning

consents to be determined within the catchment continues. The NRW advice is available here: interim-planning-advice-following-river-sac-compliance-report.pdf (cyfoethnaturiol.cymru). Finally in September 2023 DCWW advised that the Cardigan catchment was constrained placing a further development embargo on a 4th of Ceredigion's 6 towns until WWTP upgrade works are completed. This coupled with expectations of a Marine SAC data release which would constrain the remaining 2 towns results in the formal pause remaining in place at this time.

- 1.10 At a Full Council held virtually on 21 October 2021, Ceredigion County Councillors agreed a pragmatic decision needed to be reached and agreed to a temporary but as yet unspecified length pause for the replacement LDP to allow essential evidence and data to be gathered and mitigation options to be devised. Therefore, at present the replacement LDP's timetable set out in the Delivery Agreement is temporarily suspended, and we will likely need to withdraw the previously prepared replacement plan and will need to submit a revised timetable as we move forward.
- 1.11 The work of the LDP team in the interim has focussed on regeneration of the 6 main towns and the team has delivered; Green Infrastructure Action Plans, draft Place Plans, Marketing and Branding Strategies and Regeneration Plans. The team are currently undertaking Conservation Area Appraisals and Management Plans for the 6 main towns and New Quay. Meanwhile the Nutrient Management Board for the Teifi SAC has been established and work continues on identifying mitigations both strategic and site-based interventions. The policy team have also delivered the Phosphate Mitigation and Reduction (PRAM) Project, implementing phosphate reduction mitigations across the Teifi catchment. The Ceredigion LDP team are also acting as interim lead team for the Strategic Development Plan.

Legislation, National Policy and External Considerations Regional and Local Policy Considerations

1.12 Regional and Local considerations during the monitoring period include the following:

- Regional Local Housing Market Assessment
 Please see information in Section 2
- 1.13 In regard to regional conditions, work has formally restarted on Replacement LDP's for Carmarthenshire, Pembrokeshire and Powys. However, Ceredigion alongside neighbouring LPA's continues to identify opportunities for regional working (such as through the Growing Mid- Wales partnership and National Phosphates working group alongside Nutrient management Boards and Regional Strategic Flood Consequences Assessment), with the shared opportunities identified for evidence base gathering in the years ahead. The CJC and the requirements to undertake an SDP and RTP and economic wellbeing plan are also being progressed with shared working across the region being a priority.
- 1.14 Regional and Local Policy and considerations are considered in detail in Section 3. They have resulted in immediate significant changes to the context of the plan which requires the replacement LDP to completely re-evaluate the Preferred Strategy options when solutions and mitigations to the phosphate and anticipated further nutrient issues can be found, this is akin to neighbouring authorities who have had to return to earlier stages of plan preparation. Changes in relation to population distribution, high street renewal and house prices affordability have all been impacted by Covid 19 and further work is required locally and regionally to ascertain how these should inform replacement plan preparation also.

LDP Policy Monitoring

1.15 The AMR considers LDP Policies against the adopted LDP monitoring framework to identify whether the policies are being effective and to identify any policies that are not being implemented. Detailed analysis and results are set out in Section 4.

The Settlement Strategy

1.16 The following table provides a summary of the performance of AMR Strategy Indicators.

Indicator	Perform	ance								
	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
AMRH01 – Population Change	N/A	N/A	N/A	N/A	?	N/A	N/A	N/A		
AMRH02 – Settlement Strategy Countywide	0	0	-	+	-		-	-	-	-
AMRH03 – Settlement Strategy Settlement Groups	0	0	-	-	-		-	-	-	-
AMRH04 – Settlement Strategy – Development in 'Linked Settlements'	0	0	-	-	-		-	-	-	-
AMRH05 – Settlement Strategy – Development in 'Other Locations'	?	0	-	-	-		-	-	-	-

- 1.17 AMR indicator H01 relates to Population Change, as noted the 2018-based population and household projections have been received during the monitoring period and suggests that Ceredigion's population will decline between 2018 and 2043, from 72,992 to 68,745 with a corresponding reduction in the number of households by roughly 4,500. The projections reflect what has been seen in previous years with regards to housing completions and consents. The first release of the 2021 census results were published in June 2022 and the census population and household estimates confirm the downward trend and the robustness of the 2018-based projections. On Census Day (21st of March 2021), Ceredigion's population was estimated to be 71,500, which is identical to the 2018-based population projections for 2021. In terms of household numbers, census estimates were fairly in-line with what was projected, with the census figures (30,900) estimating an additional 100 households compared to the 2018-based projection (30,800). According to census data, just over half of Ceredigion's population decrease (52.6%) between 2011 and 2021 is a result of negative net migration (the number of people leaving the County is greater than those moving in), whilst negative natural change (deaths exceeding births) contributed to the remaining 47.7% of the total population decrease. The next round of component of change data (including births, deaths, internal and international migration) will provide a greater understanding of what is driving the population decline. Care should be taken when interpreting the 2018-based projections going forward, as they are based on observed trends up to 2016 and are thus outdated. The next round of sub-national population projections will be 2021 based with a proposed release of early 2024 (these will use the updated base population from the 2021 census).
- 1.18 Local population change is highly sensitive to local factors and these will be considered in further detail as part of replacement plan preparation when this is continued. Since the Global Pandemic started Ceredigion has consistently seen high interest from in-migration with house prices rising significantly and an extremely buoyant housing market as people are able to re-locate away from traditional work places or have re-evaluated their housing choices as a result of the lockdowns. Therefore, further work will be required to evaluate these

changes and impacts on population growth as evidence emerges bearing in mind the overall picture of decline as evidenced through the early 2021 Census releases.

- 1.19 AMR indicator H02 relates to the Settlement Strategy Countywide and measures the percentage split of completions and commitments countywide between from plan adoption with a target of 51% (USC's):24% (RSC's):25% (LS&OL). From adoption, the ratio of commitments and completions respectively is 41%:24%:35% and 38%:20%:43%. Incremental positive and negative movements occur year on year towards the identified targets from plan adoption. In this reporting year in respect of commitments and completions the ratio is inconsistent with the identified target. The LDP review will consider the Settlement strategy in general and identify ways to deliver housing in sustainable locations.¹
- 1.20 AMR Indicator H03 considers the settlement strategy at the settlement group level and seeks to move towards the percentage split identified for each of the 22 settlement groups in Appendix 6 of the LDP. The results show a varied picture with some individual settlement groups moving towards and some moving away from the required balance. The LDP review will consider planning application decisions by location to better understand reasons for not meeting the required balance.
- 1.21 AMR Indicator H04 considers development in 'Linked Settlements' and requires commitments not to result in any one linked settlement growing by more than 12% of its size as at April 2007. From a total 90 Linked Settlements across 22 Settlement Groups 45 (50%) have reached or exceeded their 12% growth limit. This figure compares to 36 (40%) at plan adoption. The LDP review will consider the reasons for this negative shift away from the established capacity limits across the county.

_

¹ Monitored in accordance with the indicator (from adoption) and not since plan start.

1.22 AMR Indicator H05 considers development in 'other locations'. In this monitoring period there was a 97:3 split between residential development in 'other locations' approved during the monitoring period which was in accordance with the LDP and National Policy (34 Units) and that which were not. 1 unit was approved outside that permitted by the LDP strategy, PPW 3.60 (Edition 11) and TAN 6.

Housing Delivery

1.23 The following table provides a summary of the performance of AMR Housing Delivery Indicators.

Indicator	Performa	erformance										
	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023

of Allocated	0	0	_	_	_	_	_	_	_	_		
Housing Sites												
<u> </u>												
AMRH08 – Housing												
Development in the	0	0	-	-	-	-	-	-	-	-		
Right Locations												
AMRH09 – Housing	+	+	+	+	+	+	+	+	+			
Development on												

Previously										
Developed Land										
AMRH13 – Housing Density	0	0	+	+	0	0	0	0	0	0
AMRH14 – Delivery of Housing	0	0	0	-	-	-	-	+	0	0
AMRH15 – Range of Housing	0	0	0	0	0	0	0	0	0	0

- 1.24 AMR Indicator H06 has been amended to include the Average Annual Requirement indicator. Whilst the annual requirement was based on the 6000 units required for LDP1, work has taken place to base this trajectory on actual completions to date and the revised AAR to complete this monitoring is 208 units. For 2022 23 the Annual Completions (AC) Comparison against AAR is +64 (+30.7%). The Cumulative AC Comparison against Cumulative AAR starting from 2023 is +64 (+30.7%). The LDP review will consider the appropriateness of the LDP's housing strategy polices and allocations.
- 1.25 AMR Indicator H07 required 100% of housing to be delivered on allocated sites by 2022. Whilst this target was not met, it will continue to be monitored as although there maybe issues with the size of the allocation, they remain within the most sustainable locations. The percentage of anticipated units (permissions) has increased to 20.7% from the previous monitoring period and the completions on allocated sites has increased to 9.3%. AMR Indicator H08 requires 90 100% of the requirement for USC and RSC residential development to be met on allocated sites post adoption. Again, whilst this target was not met, it will continue to be monitored for the same reason as above for H07. The results are 54.7% (units permitted in service centres) and 29.8% (units completed in service centres). The LDP review will consider the delivery of allocated sites in more detail.
- 1.26 AMR Indicators H06, H07 and H08 indicate the level of housing delivery continues to be below that which is required to meet the LDP Strategy. The appropriateness of the LDP's housing strategy, policies and allocations will be considered as part of the review of the LDP. The review will enable appropriate consideration in light of any emerging research currently being undertaken to look at housing supply and demand in Ceredigion and across Wales. The LDP review will re-assess the deliverability of all current allocated sites and, as required will identify site allocations for the LDP 2 Plan in which there is confidence of delivery during the Plan period.
- 1.27 AMR Indicator H14 seeks a year-on-year decrease in the ratio of residential outstanding consents to completions. The starting ratio of 6.5 was achieved last year with a ratio of 8. However, it continues to be highly variable year on year by decreasing to 5 this year, fluctuations suggesting this monitoring indicator is

- not a valuable indicator of progress as it is so temperamental to minor annual changes. The number of outstanding consents remains relatively static at approximately 1,600 across the county. The consents to completions ratio vary across the settlement groups.
- 1.28 AMR Indicators H09, H13 and H15 indicate that identified targets are being achieved or where they are not there are no concerns over the implementation of the policy in relation to Housing development on Previously Developed Land, Housing Density and the Range of Housing needs.

Affordable Housing (AH)

1.29 The following table provides a summary of the performance of AMR Affordable Housing Indicators.

Indicator	Performa	nce								
	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
AMRH10 –										
Affordable	0	0	0	0	0	0	0	0	0	0
Housing										
AMRH11-										
Affordable	+	+	+	+	0	0	0	0	0	0
Housing										
AMRH12 – Type										
of Affordable	?	0	0	0	0	0	0	0	0	0
Housing										

- 1.30 AMR Indicator H10 requires 1,100 affordable homes to be completed by 2022. Whist the target was not met it is consistent with the over expectation of housing delivery set in the plan, and subsequent revision downwards of population projections for the county since plan adoption. Since Plan adoption 711 (32%) of all homes completed have been affordable, which exceeds the 20% requirement.
- 1.31 AMR Indicator H11 requires at least 20% of all permitted dwellings being affordable. This target has been exceeded with 38% of all residential development permitted since plan adoption being affordable. The number of viability challenges to the affordable housing policy (Policy S05) continues to be relatively high with 3 viability challenges mounted during the monitoring period, 100% of which were wholly or partially successful. Policy S05's housing requirements were justified by a 2010 study concerning economic viability of providing affordable housing. The Council commissioned a regional update to the viability assessment for the region and a Development Advice Tool (DAT) which is effectively a viability challenge calculator, the results of which will be used to inform the LDP review.
- 1.32 AMR Indicator H12 considers types of affordable housing and requires a % split in accordance with housing need evidence. The previously identified target requires the ratio of affordable housing types to be 9% (DFS 70%):32% (DFS 50%): 59% (Social Rent). Whilst these targets are not currently being met the overall distribution of affordable housing is considered satisfactory and there are no immediate concerns. This is because evidence including the LHMA (2019 and a re-fresh currently being reviewed, utilising the new WG model)) and the Strategic Viability Assessment (2017) demonstrate that, whilst the required tenure split is not being met, it is not a significant concern as the actual delivery of units aligns closely with the updated evidence. Further evidence on housing need and viability is expected in mid-2024, following which consideration will be given to policy change in any future replacement plan.
- 1.33 In summary, positive movements towards identified Strategy targets have been realised, however the scale / rate of progress is not as fast as anticipated. Housing supply and delivery indicator targets are not being met. Whilst it is noted that this is not a locally specific issue the LDP review will consider how to

support more effective supply and delivery of housing in the county. More than 20% of all homes permitted and completed are affordable which is positive. However, the average annual rate of progress is not as fast as anticipated and identified targets were not reached by the end of the plan period the reasons for which are multifaceted and strongly suggest an over provision of housing based on flawed population projections from the start of the plan period.

Economy and Retail

1.34 The following table provides a summary of the performance of AMR Economy and Retail Indicators:

Indicator					Perform	ance				
a.outo.	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
AMRE01 – Employment Land Supply	+	+	+	+	+	+	+	+	+	+
AMRE02 – Delivery of Allocated Employment Sites	+	+	+	0	0	0	0	0	0	0
AMRE03 – Economic Development in the Right Locations	+	+	+	+	+	+	+	+	+	+
AMRE04 – Economic Development on Previously Developed Land	0	0	+	+	+	+	+	+	+	+
AMRE05 – Town Centres	+	?	?	+	+	0	0	0	0	0

Indicator	Performance											
	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023		
AMRE06 – Vitality of Rural Service Centres	?	+	+	+	+	+	+	+	+	+		
AMRE07 – Retail Frontages	0	0	+	+	+	+	+	+	+	0		

1.35 Economy and Retail Targets are predominantly being achieved and there are no significant concerns over the implementation of economic and retail policies. AMR Indicator E02 requires 100% of allocated sites to be permitted and completed by 2022, and only 81% and 61% respectively of development has been permitted and completed to date. Whilst this target was not achieved there are no concerns over the implementation of the policies. The Council is in the process of updating its economic evidence base which will include a larger than local employment land review and needs assessment commissioned jointly with Powys to consider the delivery of existing employment allocations and the economic land supply needs into the future.

Quality of Life

1.36 The following table provides a summary of the performance of AMR Quality of Life Indicators

AMR Indicator	Performance												
AMR Indicator	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023			
AMRQ01 – Loss of Open Space and Facilities	0	+	+	+	+	+	+	+	+	+			
AMRQ02 – Loss of Greenfield Land	0	0	0	0	0	0	0	0	0	0			
AMRQ03 – The Gain of Open Space	0	0	0	0	0	-	-	-	-	1			
AMRQ04 – Environment and Local Biodiversity	+	0	-	0	0	0	0	0	0	0			
AMRQ05 – Environmental Enhancements	-	-	0	+	0	0	0	0	0	+			

AMR Indicator					Perforn	nance				
Amit maleutor	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
AMRQ06 – Infrastructure	?	?	+	+	+	+	+	+	+	0
AMRQ07 – Reducing Flood Risk	-	0	+	+	+	0	0	0	0	0
AMRQ08 – Installed MW Capacity in SSA D The monitoring indicator was suspended to reflect the provisions of Future Wales	0	?	0	0	0	?	?	N/A	N/A	N/A
AMRQ09 – Waste	?	?	?	?	?	?	?	?	?	?
AMRQ10 – Aggregates	0	0	0	+	+	+	+	+	+	+

1.37 AMR Indicators Q01, Q07 and Q10 indicate that identified targets are being achieved. AMR Indicators Q02, Q03, Q04, and Q05 targets are somewhat being achieved and where targets are not being met there are no concerns over the implementation of the relevant policies. In regard to AMR Indicators Q09 no conclusions can be drawn at this stage. In regard to Q06 3 Service Centres (2 waste water treatment works) 2 WwTW, of settlements close to Aberystwyth still have no capacity to accommodate further growth other than that with extant consent, unless developers fund improvements themselves. And, whilst the delivery of phosphate related schemes at Lampeter WwTW and Llanybydder WwTW (serves Llanwnnen and Allt-y-blacca in Ceredigion) has been brought forward from AMP8 To AMP7 (by March 2025), no improvements on WwTW capacity are planned. Although not within the monitoring period, in September 2023, Ceredigion County Council were notified by DCWW that no further development could be permitted in Cardigan without a condition restricting occupation until 2027 due to the upgrade works required at Cardigan WwTW. It has since been demonstrated that DCWW were aware of the failure of the WwTW and that of Llanfarian WwTW for many years.

Strategic Environmental Assessment/Sustainability Appraisal Monitoring

1.38 The SEA Directive requires that the Council monitor the state of the environment through monitoring the sustainability objectives set out in the SA/SEA Report. This forms an integral part of the AMR and is contained in Section 5. A summary of the performance of SA Objectives and indicators is provided in Appendix 3. Any changes to the framework are included in Appendix 1. In conclusion, the SEA/SA monitoring indicates a positive change to the environment thus far in the plan timeframe.

Conclusion and Recommendations

1.39 In regards to the LDP Housing indicators, this year's AMR continues to show some positive movements towards identified targets for some indicators, however the rate of progress is not as fast as anticipated and it is now clear

that the plan period targets were not achieved by 2022. However as stated this is due in part to the flawed population projections on which LDP1 was based, and therefore what has been delivered is more akin to the actual need than that which was planned for, and in positive news the Affordable Housing target has yet again been exceeded (38% vs 20% target). Other housing indicators highlight the need for further investigation and new and emerging evidence which will inform the LDP review around allocated site size, Covid 19 related population change, housing affordability, Phosphate's restrictions and capacity issues with WwTW's. In regard to the LDP Economy and Retail and Quality of Life indicators, targets are either being met or, where they are not being met, raise no immediate concerns for policy implementation, however structural changes to the high street have been evident pre-Covid but have as a result of the pandemic been speeded up and thus work will remain ongoing on how best to support the high street and the suitability of primary and secondary frontages. The policy team has focussed on placemaking and regeneration opportunities for the 6 towns since formal pause on the LDP was confirmed.

2.1 The following section considers contextual changes that have, or could have, an influence on the implementation of the LDP including National, Regional and Local policy and conditions.

National Legislation, Policy and Guidance

Town and Country Planning (Use Classes) (Amendment) (Wales) Order 2022

- 2.2 The Town and Country Planning (Use Classes) Order 1987 has been amended to create new use classes. The new use classes are for dwellinghouses used as sole or main residence (Class C3), dwellinghouses used otherwise than as sole or main residences (Class C5) and short-term lets (Class C6).
- 2.3 The Use Class Order has also been amended in relation to betting shops.
 Betting shops have been removed from use class A2 (Financial and Professional Services) and are now specified as a unique use (Sui Generis).

Town and Country Planning (General Permitted Development) (Amendment) (Wales) Order 2022

- 2.4 The Town and Country Planning (General Permitted Development) Order 1995 has been amended to allow permitted changes between the new C3, C5 and C6 use classes. Further amendments have been introduced which permit the change of use from a betting shop to other specified use. These reflect the changes of use which were permitted when betting shops fell within use class A2.
- 2.5 The 2022 Amendment Order also sets out a new Article 4. The new Article 4 replaces the former directions with two new types of direction. The new directions consist of an immediate direction and a non-immediate direction. The requirement to secure the approval of Welsh Ministers for Article 4 Directions has also been removed.

2.6 To mitigate claims for compensation, the new permitted development rights relating to second homes and short-term lets have been added to the prescribed list in the Town and Country Planning (Compensation) (Wales) (No. 2) Regulations 2014. A 12 month notice period is needed ahead of the implementation of an Article 4 Direction if compensation is not to be paid.

Planning Policy Wales

- 2.7 Changes are being made to Planning Policy Wales to complement the amendments made to the Use Class Order and General Permitted Development Order in relation to second homes and short-term lets.
- 2.8 The policy changes indicate that, where relevant, the prevalence of second homes and short-term lets must be taken into account when considering housing requirements and policy approaches in LDPs.
- 2.9 The updates to PPW instruct planning authorities to place conditions restricting the use of new dwellings in areas where an Article 4 Direction has been introduced to Class C3. Local authorities are also instructed to allocate sites in LDPs which are restricted to C3 use in areas where they are seeking to manage second homes and holiday lets.

Consultations

- 2.10 During the reporting year, published consultations with potential for impact on the LDP included:
 - Amendments to Permitted Development Rights (Welsh Government, September 2022)
 - Planning Legislation and Policy for Second Homes and Short-term Holiday Lets (Welsh Government, September 2022)
 - Technical Advice Note 11: Air Quality, Noise and Soundscapes (Welsh Government, January 2023)
 - Technical Advice Note 15: Development, Flood Risk and Coastal Erosion (Welsh Government, April 2023)

- Planning Policy Wales: Net Benefit for Biodiversity and Ecosystems'
 Resilience (Welsh Government, May 2023)
- Designing for Renewable Energy in Wales (Design Commission for Wales, June 2023)
- 2.11 The following research, policy and guidance was also published during the monitoring period and at the very end of the monitoring period for 2022 2023:
 - Place-based Approaches to Community Engagement and Support (Welsh Government, June 2022)
 - Changes to Planning Legislation and Policy for Second Homes and Short-term Lets (Welsh Government, September 2022)
 - Housing Overcrowding and Ethnicity: A Literature Review (Welsh Government, September 2022)
 - Cymraeg 2050: A Million Welsh Speakers Research and Evaluation Framework (Welsh Government, November 2022)
 - COP 15, Biodiversity Deep Dive, Section 6 Duty and the Planning System (Welsh Government, December 2022)
 - Development Plan Examinations: Procedural Guidance (Welsh Government, February 2023)

Conclusion

2.12 Amendments to legislation and national planning policy over the monitoring period have primarily centred around permitted development rights in relation to second homes and short-term lets. This has been complemented by amendments to Article 4 of the Town and Country Planning (General Permitted Development) Order 1995 which seek to simplify the process of introducing Article 4 Directions. The Local Authority are considering implementing an Article 4 in this region but are currently focusing on evidence base gathering and consulting with neighbouring regions on their progress.

National Conditions

Housing

- 2.13 Data from StatsWales indicates that during 2022 23 (last available annual figures), the number of new dwellings started nationally decreased by 19% compared to the previous year 2021 22 (5,659) to 4,556 dwellings across Wales. The number of new dwellings completed increased by 10% during 2022 23 compared to the previous year 2021 22 (5,273) to 5785 dwellings across Wales (New house building (gov.wales)).
- 2.14 RSLs were responsible for most social sector completions and 193 new dwellings were completed by Local Authorities in 2022 23 (last available annual figures). 37% of all new dwellings completed in Wales during 2022 23 were 3-bedroom properties. Conversely, 45% of all new dwellings completed between 2022 23 in Ceredigion were 3-bedroom properties (New house building (gov.wales)).

Economy

2.15 The Labour Force Survey published in July 2023 for the period April 2022 – March 2023 indicated that at March 2023 the employment rate in Wales was estimated to be 73% of people aged 16-64 (1.5 million people) – down 0.6 percentage points from the previous year at March. The number of people who were economically inactive (16 - 64 excluding students) in Wales for the year ending March 2022 was 369,300 (up by 26,500 compared to the previous year at March).

https://statswales.gov.wales/Catalogue/Business-Economy-and-Labour-Market/People-and-Work/Labour-MarketSummary/annuallabourmarketsummary16to64-by-welshlocalareaseconomicactivitystatus

2.16 The public sector is a significant employer in Wales with 30.5% (year ending March 2023) of people in employment being employed in the Public Sector compared to 29.5% (2022), 30.8% (2021), 26.5% (2020), 28.5% (2019), 27.4% (2018), 25.9% (2017), 26.7% (2016) and 27.9% (2015)., In general the pattern

has been that of a slight increase and there have been no significant shifts in workforce jobs by industry since the plan's adoption in 2013.

https://statswales.gov.wales/Catalogue/Business-Economy-and-Labour-Market/People-and-Work/Employment/PersonsEmployed/publicprivatesectoremployment-by-welshlocalauthority-status

- 2.17 As a result of Covid 19 national lockdowns, a move to online shopping and the cost-of-living crisis the impact on the high street has been considerable. It will be imperative in targeting support to the high street to understand how these relatively quickly implemented trends changes long-term retail habits in the coming years. As at quarter 1 in 2022 vacancy rates across Wales were 16.9% (WRC 2022) effectively meaning over 1 in 6 high-street units were empty, though all but one of Ceredigion's towns (Llandysul) were below this rate, with high street surveys demonstrating a growing independent retail sector in our towns.
- 2.18 In terms of the economy, the picture remains similar to the 2016 2022 AMRs; however, work on Growing Mid Wales, particularly the evidence base, to identify programmes of intervention has identified employment growth in quality jobs and availability of employment land as a priority area alongside the supporting of high tech and agri tech industry. Therefore, when these interventions are realised, we expect to see an uptake of employment sites and will be seeking in the future LDP review to support land allocations that support the programme of interventions. A larger than local employment needs and premises assessment has been commissioned jointly by Powys, Ceredigion and Welsh Government has been published and the results of which will inform the preparation of the LDP2 Deposit.

Other National Context Changes

Brexit

- 2.19 The transition period for Brexit ended on 31/12/2020
- 2.20 The Office for Budgetary Responsibility estimate that Brexit has had impacts on the economy amounting to a drop in long run productivity of 4% and a drop in

imports and exports of 15%, its short-term impacts continue to be felt, the longer-term impacts are more difficult to predict. It's effects will become clearer over time and this will continue to be considered in respect of the LDP and any subsequent review.

Covid-19 Pandemic

2.21 The impact of the pandemic on the economy will not be truly known for some time. The impacts on Ceredigion and its residents and businesses will be closely monitored for the foreseeable future. We know that the pandemic has impacted upon the housing market locally, with an extremely buoyant market and anecdotal evidence of significant in-migration. There have been shortages of labour in some sectors (again not Covid specific likely to be caused by Brexit) and we have seen larger multinational chains pull out of our towns with empty properties blighting the high street. As we are still in the aftermath of the pandemic it is hard to say at this stage what this means for the monitoring as well as the replacement plan however the LDP team remain actively engaged in considering how to manage these changes for the replacement LDP.

War in the Ukraine

2.22 War in Europe between Russia and the Ukraine has had a significant impact on global wheat, oil, gas and electricity prices which has caused uncertainty in the markets and soaring inflation, all of which are coupled by Brexit and the Covid-19 pandemic. The main impacts of this in Ceredigion relate to the 'cost of living crisis' as the rising costs of food and heating push people into poverty and reliance on charitable associations. The impacts of this on the current plan and any future plan are not yet clear but focus will need to be on Affordable Housing that is energy efficient to reduce annual heating bills.

Phosphate Levels in the Afon Teifi Special Area of Conservation (SAC)

2.23 The impact of the NRW Phosphates Interim Planning advice issued in January 2021 and updated in May 2021, June 2022 and August 2023 on developments

- in Ceredigion cannot be understated. Whilst the authority is mindful of their statutory duty as the competent authority in decision making in this regard, comparative to other authorities with similar issues we are disproportionately affected.
- 2.24 The size of the SAC catchment across Ceredigion which is effectively under a development embargo is 806 km² equating to 44.6% of the total land area of the county. It impacts upon 3 of our 6 main settlements, representing the most sustainable locations for future growth namely Tregaron, Llandysul and Lampeter, (Newcastle Emlyn being located in Carmarthenshire) and partially constrains a 4th Ceredigion settlement; Cardigan. These settlements comprise one of only 2 regional growth areas in the county as defined in Future Wales The National Plan 2040 titled the 'Teifi Valley Growth Zone' and are now undevelopable.
- 2.25 Under AMP 7 (2020 2025) phosphate related schemes in Lampeter WwTW and Llanybydder WwTW (serves Llanwnnen and Alltyblacca in Ceredigion) have been brought forward. It is not yet clear whatthe proposed AMP 8 (2026 2030) improvements by Dŵr Cymru Welsh Water (DCWW) on their Waste Water Treatment Plants (WWTP) will be. 47 settlements in total being currently impacted. This provides very limited surety that solutions to the development embargo will be found in the coming decade for almost 50% of Ceredigion or in population terms approx. 21,200 residents and 9,600 households.
- 2.26 Source Apportionment evidence from DCWW demonstrate that 68% of the phosphates in the Afon Teifi is as a result of run off from WWTP, thus without chemical solutions, or plant upgrades nature-based solutions need to be sought and these can be difficult to implement and take time to organise and for benefits to be realised. Viability in the region also makes implementing a Nutrient Credit Trading Scheme difficult.
- 2.27 In terms of the current LDP the planned growth for the settlements impacted was 572 houses of which 115 were expected to be Affordable Homes spread over 14 allocations (24% of all housing allocations). 7 further employment and mixed-use sites are now impacted again representing up to a 3rd of such developments countywide. Whilst it's convenient to see these as mere numbers

- they do in fact represent the hopes and dreams of a number of Ceredigion residents.
- 2.28 Whilst the LDP articulates the strategic vision for the county in spatial terms, many of the councils' own projects are in jeopardy these include, the Cylch Caron integrated Care Centre which is likely to need a new planning application and will therefore be caught by the embargo. Furthermore, Welsh Governments own Transforming Towns grant may not be fully realised in Ceredigion as a number of potential and allocated projects are unable to go forward. Including those administered by the Local Authority for the revitalisation and repurposing of town centre properties; a central principle of the National Development Plans 'Town Centre First' approach. Here in Ceredigion, we will be unable to articulate the central tenants of national policy as growth will have to be directed out of town centres and away from the most sustainable locations and from the nationally designated regional growth areas.
- 2.29 It is anticipated that the replacement LDP will now be significantly delayed as the previous Preferred Strategy needs complete reassessment. Furthermore, in preparing a replacement plan it must meet the needs of the entire county and not only 45% of it, otherwise the plan will not meet the tests of soundness at examination. This will have an impact on monitoring, land availability and economic growth going forward, and could potentially delay development of the Strategic Development Plan and embedding the vision of the Growing Mid Wales partnership into a spatial plan.

Regional Policy and Conditions

Adjoining Authorities and Collaborative Working

2.30 Pembrokeshire Coast National Park Authority's replacement LDP was adopted on 30/09/2020, Pembrokeshire County Council and Carmarthenshire County Council adopted LDPs in 2013 and 2014 respectively. Pembrokeshire County Council, Bannau Brycheiniog National Park Authority and Carmarthenshire County Council have all commenced plan revision. However, their replacement LDPs are now on hold or have moved back in stages of plan making due to the aforementioned Phosphates issues in riverine SACs, LDPs for Powys and for

- Gwynedd and Anglesey (Joint Plan) have both been adopted, Powys have commenced replacement plan preparation in 2022.
- 2.31 Ceredigion County Council participated in all neighbouring plan making processes as did those Authorities in Ceredigion's LDP, to ensure cross boundary complementarity. Following a letter from the Cabinet Secretary requesting that authorities consider joint working and subsequent meetings to discuss this, Ceredigion County Council continues to identify opportunities for regional collaboration across borders as appropriate. Ceredigion has worked in collaboration with several neighbouring authorities on joint commissioning of a, Strategic Viability Assessment, Strategic Flood consequences Assessment, Local Housing Market Assessment and several other smaller projects/ pieces of evidence where cross border working is opportune. The main piece of work that has been produced through regional collaboration during the monitoring period includes the establishment of the Nutrient Management Boards for the Teifi, Cleddau and Tywi rivers and associated evidence base. The region has worked tirelessly to deliver on phosphate mitigations and solutions which has included being the first to establish boards, production of a regional calculator and mitigation guidelines, creation of Nutrient Management positions and reviewing of evidence and lobbying at a national level.
- 2.32 The Introduction of Future Wales in 2021 and the requirement to undertake Strategic Development Plans (SDPs) also continues to be a focus of regional collaboration with work ongoing to set up the Corporate Joint Committee (CJC) and associated sub groups including that for the SDP which is currently considering options on SDP resources, given the differing plan making stages of the constituent local planning authorities. With Ceredigion LDP team currently acting as interim lead authority.
- 2.33 The growing Mid Wales Partnership continues to seek to provide a strategic focus and lead for the economic development of the Powys and Ceredigion Areas since its establishment in 2015. Trafnidaeth Canolbarth Cymru (TraCC) has been consolidated into the CJC as the Regional Transport Plan sub group and will continue to function as the Mid Wales Infrastructure and Connectivity Group, in order to align strategic transport planning activity with the partnership work to diversify the economic base, support and strengthen the economic

Analysis of Significant Contextual Change / Indicators

- base, create new jobs and opportunities, develop workforce skills and improve communications accessibility and infrastructure. As well as prepare the RTP.
- 2.34 Regional Policy and conditions introduced this year have significantly altered the context of the plan both in Ceredigion and in neighbouring authorities. Implications relating to Brexit, Covid 19, the war in Ukraine and the structural changes that have ensued as a result and Phosphates guidance from NRW have created significant challenges to LDPs and resulted in delays for most LDPs regionally further extensive work will be required to understand the full context of what this means for LDP revision which is underway.

Local Policy and Conditions

Population and Household Data

2.35 Population growth in Ceredigion is entirely a product of net in-migration and is very sensitive to local factors, such as changes in the enrolment of higher education students and other migration trends. Subnational population projection for 2018 to 2043 released in February 2020 (See AMRH01), suggests that Ceredigion's population will decrease by 3.3% to approximately 70,600 in 2028. This was confirmed by the Census data releases which demonstrated Ceredigion had the highest population decline in Wales at 5.8%. However, the impact of structural changes resulting from the Covid 19 pandemic have not been factored into such revisions therefore some ambiguity exits as to how population change may continue in Ceredigion particularly when we consider the buoyancy of the local housing market with demand outstripping supply.

Housing

2.36 In the current uncertain financial and political context, it is impossible to disentangle the effects of changes in methodology from changes in the underlying trends, such as a stronger pull towards urban centres and away from rural areas or vice versa as a result of greater flexibility in terms of home working as a result of the pandemic. A small decline in population does not

Analysis of Significant Contextual Change / Indicators

necessarily result in fewer households but, as the population ages, there is likely to be a growing mismatch between its needs and the types of dwellings available. The main issues regarding housing delivery relevant to Ceredigion beside the population trends – are that there is a general lack of delivery across Wales, Ceredigion included, with the added issue of there being no volume builders operating in this region and viability being generally poor particularly in in-land areas which will be most impactful on the regional Teifi Growth zone as it is now constrained by phosphates and a developer pays solution to phosphate mitigations is unlikely to be viable..

Education

- 2.37 No New schools have opened this year and no schools closed.
- 2.38 Consideration of new and closing schools and implications for the LDP development strategy, if any, will be considered as part of the LDP review.
- 2.39 Local Policy and conditions introduced this year have resulted in significant changes in the context of the plan and further work is needed to understand the impacts moving forward. Any required changes to the plan will be considered as part of LDP replacement as and when work re-starts on the rLDP.

3. Analysis of Core & Local Indicators

- 3.1 Indicators, targets and trigger levels have been identified to assess the performance of policies and objectives. The triggers included in the monitoring regime will give an early indication on the performance of the Plan and possibly how wide ranging a Plan review may need to be.
- 3.2 As a visual aid in monitoring the effectiveness of policies and to provide an overview of performance, key indicators and outcomes are highlighted as follows.

Indicator Performance

Significance of performance	Description
+	Targets are being achieved.
?	No conclusion can be drawn at this stage.
0	Targets have not been achieved but no concerns over implementation of policy(s).
-	Targets are not being achieved and there are concerns over implementation of policy(s).
N/A	Not applicable

Monitoring Actions

Continue Monitoring

Development plan policies are being implemented effectively.

Training Required

Development plan policies are not being implemented as intended and officer or Member training is required.

Supplementary Planning Guidance (SPG) Required

Development plan policies are not being implemented as intended and further guidance is required, potentially preparing additional SPG.

Further Investigation/Research Required

Development plan policies are not being implemented as intended and further research and/or investigation is required.

Policy Review Required

Development plan policies are not being implemented and are failing to deliver; a review of the specific policy may be required.

Plan Review

Development plan policies are not being implemented and the plan's strategy is not

being delivered, triggering a formal review in advance of the statutory 4-year review.

3.3 The plan review was triggered in 2016 after the 3rd AMR, therefore the above monitoring actions may not be relevant. However as stated in earlier sections, the replacement plan is not currently being progressed due to the situation with regards NRW guidance on Phosphates on riverine SACs in Wales.

	households and this		
	demographic information will		
	be considered against the		
	policy objectives of the LDP		
	to see whether any specific		
	action needs to be		
	undertaken.		

Various measures on population and household numbers are showing an overall downward trend for Ceredigion when compared with earlier releases.

Census data on population and household estimates are the most authoritative figures available and are fundamental to our understanding of population and household change. On Census Day (21st of March 2021), Ceredigion's population was estimated to be 71,500, a decrease of 5.8% since the 2011 Census (75,900). In terms of household numbers, the 2021 Census estimated

30,900 households in Ceredigion, a decrease of 2.1% since the census in 2011 (31,600). Both the 2021 Census population and household estimates are fairly in-line with what the 2018-based projected for 2021.

Notably, out of the 22 local authority areas in Wales, Ceredigion experienced the greatest population decline (by -5.8%/4,500) and the second greatest household decrease (by -2.1%/700) since the previous census in 2011.

Similarly, the latest Mid-Year-Estimates (MYEs) series demonstrates an overall population decline in Ceredigion, from its peak of 76,000 in 2012 to 70,660 in 2021. The household estimate for Ceredigion also shows a reduction, albeit a more gradual reduction, from its peak of 31,860 households in 2013 to 31,410 in 2020.

The 2018-based population and household projections are the latest official projections; however, care should be taken when interpreting these projections as they are based on observed trends up to 2016 and are thus outdated. The 2018-based projections suggests that Ceredigion's population will decline by approximately 4,250 people between 2018 and 2043, from 72,992 to 68,745, with a corresponding reduction in the number of households by roughly 4,500. The 2018-based projections reflect a reversal in the demographic trend compared to the 2014-based set, which suggested a growth of approximately 5,400 people and 2,800 households between 2017 and 2037, from 76,000 to 81,500. Notably, a change has been made to the methodology of the 2018-based projections, internal (UK) migration is now based on migration rates rather than fixed numbers, which may have contributed to a slight reduction of the population shown in the population projections. According to census data the average household has continued to decline from 2.3 residents per household in 2011 to 2.2 in 2021. This reflects a continuation of long-term trends in response to a range of social factors (such as staling fertility rates) and an increase in the number of single-person households. A decline in population does not necessarily result in fewer households but, as the population ages, there is likely to be a growing mismatch between its needs and the types of dwellings available. The interpretation of the 2018- based projections suggests that

there is likely to be a lower housing need, and consequently a lower demand for new dwellings which would need to be factored into the development of the LDP 2.

Using 2018 to 2033 as the base period, the effects of changing numbers in population projections are illustrated in the figure below.

Household	No. of households	No. of households	No. of additional
projection base	in 2018	in 2033	households
year			
2011	32,422	33,898	1,476
2014	32,332	34,538	2,206
2018	31,190	30,719	471

Population growth in Ceredigion is entirely a product of net in-migration and is very sensitive to local factors, such as changes in the enrolment of higher education students and other migration trends. According to census data, just over half of Ceredigion's population decrease (52.6%) between 2011 and 2021 is a result of negative net migration (the number of people leaving the County is greater than those moving in), whilst negative natural change (deaths exceeding births) contributed to the remaining 47.7% of the total population decrease. The next round of component of change data (including births, deaths, internal and international migration) will provide a greater understanding of what is driving the population decline.

Welsh Government intend to publish their sub-national population and household projections every two years, however; their 2020-based projections were not produced in the autumn of 2021 due to the proximity of the census result dates. The next round of sub-national projections depends on ONS' decision to produce either 2021-based or 2022-based National Population Projections. As there is a delay in the re-basing work both options are currently being considered. Therefore, the autumn/winter of 2024 is the earliest we can expect to see the updated sub-national household and population projections.

It is important to note that Census Day took place during the COVID-19 Pandemic, which may have affected people's choice of usual residence, for example students, which make up a high percent of Ceredigion's population. These changes might have been temporary for some and more long lasting for others. Therefore, from a Ceredigion perspective it may be some time before we can rely on the accuracy of housing projections realistically picking up on the nuances of such factors.

Initiatives such as Growing Mid Wales may be the best means to reverse the declining population trend we are seeing in Ceredigion.

Conclusions

The 2021 Census results have confirmed that both the population and number of households in Ceredigion is in fact declining. It is likely that this decline is due to a combination of factors, such as, staling fertility rates, negative natural change, and net outward migration. Subsequent component of change data will provide a greater insight into what is driving the decline. These projected trends and the driving factors will be integral to the development of the LDP 2 (once released from pause). In the interim, initiatives such as Growing Mid Wales may be the best means to reverse this trend.

exceptions) that are the
cause of the balance not
being met countywide.

The Strategy of the LDP is to refocus growth into Service Centres and the purpose of this indicator is to measure the effectiveness in delivering development in accordance with the settlement strategy. The 2023 results show that the percentage split of commitments at 41:24:35 is not consistent with the identified target of 51:24:25. The percentage split has remained static for the last few years, moving a percentage point or so between each settlement type. In terms of completions the ratio has remained reasonably static. Completion numbers have reduced since the start of the plan period which reflects part of a broader national picture of reduced completions. When measured from plan adoption (and from plan start), the percentage split of completions (Urban:Rural:Linked Settlements & Other Locations) has fluctuated slightly but does not show any significant change in ratio.

The following table summarises performance against the indicator measured from both plan start and adoption for commitments and completions.

AMR	Performance measured from Plan Start	Performance measured from

2023	40:17:43	38:20:43	

^{*}Performance ratios are shown as Urban Service Centres: Rural Service Centres: Linked Settlements and Other Locations. Figures may not sum correctly due to rounding.

Conclusions

The target has not been met for completions or commitments.

Actions

The target has not been met for completions or commitments. The planning service continues to strive to deliver housing in sustainable locations where Phosphate's restrictions allow. The LDP revision will consider the Settlement Strategy and will identify ways to deliver housing in sustainable locations.

Whilst the indicator is looking to measure from plan adoption the monitoring framework relies on data from plan start and cannot be measured from plan adoption.

For commitments: Of the 22 service centres, 9 did not achieve improvements in the proportional split, 5 improved and 8 experienced no change since the previous monitoring period.

Those that did not improve included Cardigan, Aberystwyth, Lampeter, Bow Street, New Quay, Felinfach/Ystrad Aeron, Llanon, Penrhyncoch & Talybont.,. Of these groups however, for completions, Aberaeron, Cardigan, Llandysul, Tregaron, New Quay, Felinfach/Ystrad Aeron, Llanilar, Llanon, Llanrhystud and Talybont experienced an improvement in the proportional split since the previous monitoring period. Aberystwyth, Newcastle Emlyn (Adpar), Lampeter, Aberporth/Parcllyn, Cenarth, Llanarth, Penrhyncoch, Devils Bridge, Pontrhydfendigaid and Borth experienced a decrease in the proportional split for completions since the previous monitoring period.

The results indicate a varied picture across service centres since the first monitoring period in 2014. Since this time a total of 14 settlement groups have achieved improvements in the percentage split of commitments, and 11 have achieved an improvement in the percentage split of completions.

Conclusions

The results show a varied picture with some individual settlement groups moving towards and some moving away from the required balance identified in Appendix 2 of the LDP. Since 2014, the change in the percentage split of commitments varies from +22.9% (Borth) to -16.8% (Talybont) and the change in the percentage split of completions varies from +29.9% (Felinfach) to -15% (Pontrhydfendigaid).

It is recommended that when work re-starts on the LDP revision, it should consider the settlement strategy in general and specifically delegated and non-delegated planning application decisions by location (and specifically post plan adoption), spatial distribution of growth need and delivery to better understand the spatial variations in balance across the County. The review of the settlement strategy will also need to consider in more detail the Ceredigion specific patterns of growth and how these have shaped the natural patterns of development and how LDP 2 can support these rural issues in the most sustainable way.

Actions

The target has not been met for completions or commitments. This indicator and the implications for it on plan delivery will need to be considered in future plan review.

LDP).	commitments.	
	1 LSs fell back within	
	the 12% growth limit.	
	See Appendix 7 for full	
	details.	

From the total 90 Linked Settlements across 22 Settlement Groups 45 (50%) have reached or exceeded their 12% growth limit.

This figure compares to 32 (36%) at Plan adoption in 2013. Since last year's AMR, 1 Linked Settlements (fell back within their 12% limit.

Conclusions

50% of Linked Settlements have reached or exceeded their 12% growth limit. It is noted that at the point of plan adoption in 2013 36% of Linked Settlements had already reached or exceeded their growth limit as a result of inherited planning approvals made under a previous planning regime. For all Linked Settlements which have reached or exceeded their 12% growth no further development should be permitted unless justified under Policy S04.

Actions

For all Linked Settlements which have reached or exceeded their 12% growth no further development should be permitted unless justified under Policy S04. The LDP revision will need to consider why there is a negative shift away from capacity limits across the county, and consider alternatives to managing growth in rural settlements that allow the settlement to sustainably meet its specific rural needs. It is also important to recognise that the plan end date was 2022, and whilst no formal drop-dead date exists and the current plan will remain the plan in perpetuity the housing numbers become less useful as some large linked settlements will continue to need to deliver housing to meet local needs beyond their original cap provided, they meet the national sustainable place making goals and this is not incongruous with Future Wales the National Plan 2040.

It is noted that the sites included as allocations aren't generally worse or more constrained, but that financial barriers to development and sale of market housing continues to impede progressing larger sites. A further consideration of the failure to achieve the timely delivery of LDP allocations has been the significant tightening of financial markets, both for development finance and for mortgage finance. It is also clear that sites in Ceredigion that are delivered are usually substantially smaller than the allocated sites in the current plan and therefore where economies of scale may deliver larger housing sites elsewhere this type of development simply does not exist in Ceredigion due to the absence of volume builders.

A further factor which has an impact on housing deliverability is the demand side, driven largely by population growth and reducing household size. The 2018-based projections reflect a reversal in the demographic trend compared to forecast trajectories on which the LDP relied. Put quite simply, the growth anticipated by the 2008 forecasts has not taken place at the rate predicted and a later forecast (2011) was accompanied by a WG letter to Heads of Planning to treat this lower data with caution.

Conclusions

Population changes and appropriateness of allocations are matters best considered as part of the revision of the Plan together with the LDP's housing strategy, policies and allocations across Ceredigion in light of any emerging research currently being undertaken to look at housing supply and demand across Wales.

Actions

Continue to annually monitor progress whilst acknowledging the faults in the data set on which the plan was based and work in the future review to ensure a more robust methodology for forecasting housing demand is employed.

completed by 31st of	LDP allocations (units) as	will involve an analysis of the					
March 2017.	follows:	relationship between planning					
		permissions and completions.					

i. At 31st of March 2015, 40% 100% of total number ii. At 31st of March 2017, of dwellings anticipated to be 60% delivered on allocated iii. At 31st of March 2019, sites to be completed 84% by 31st of March 2022. iv. At 31st of March 2021. 100% 2. Amount of housing development completed on allocated sites as a % of LDP allocations (units) as follows: i. At 31st of March 2015, 20%

ii. At 31st of March 40%	2017,	
iii. At 31st of March 64%	2019,	
iv. At 31st of March 88%	2021,	

The percentage of anticipated units on allocated sites has increased this year to 20.7% and whilst the targets were not met for 2022 end of plan, the increase shows a minor positive step in the right direction. The poor delivery of allocated sites in general reflects the continuing relatively depressed housing market conditions, low market confidence together with the relatively long lead in time for larger allocated sites, continuing difficulties with development finance and the resulting long-term commitment to investment, prior to a developer achieving a financial return. Only a limited number of local builders have the ability to venture the scale of development proposed.

The replacement LDP (and associated evidence such as a Strategic Viability Assessment and an Allocated Site Review) will need to consider concerns regarding the local construction industry and allocated site size as well as general population decline.

Conclusions

The percentage of anticipated units (permissions) has increased to 20.7% from 19% in 2022.

Actions

The LDP revision will consider delivery of allocated sites in more detail including analysis of the relationship between planning permissions and completions and size of allocation.

	of total development			
	completed in the Service			
	Centres (units post LDP			
	adoption).			

This is reflective of the time it takes for allocations to turn into permissions and permissions to become completions and the filter through effect. Given more time for development to come forward as it is common for allocations to take time to deliver more growth is anticipated in the USCs and RSCs as the market improves. However, the target is not being met and some explanations for this include:

- The low number of completions across the County including within the Service Centres;
- The number of allocated sites with planning permissions approved prior to LDP adoption; and
- A general slowdown in the development industry nationally, coupled with small windfall and infill development being targeted by small scale local developers whose business model precludes larger scale / long term allocations
- The implications of the NRW phosphate guidance on constraining development in 3 of the 6 main towns in Ceredigion

Conclusions

Whilst the target has not been achieved, positive movement in the right direction is evident since plan adoption and since the previous monitoring period.

Actions

The replacement LDP will consider the appropriateness of existing allocated sites to inform Plan revision, in particular seeking out sites for future allocation that meet the business model of developers operating in Ceredigion

Monitoring Reference: AMRH10 (Statutory Indicator)

Aspect Monitored: Affordable Housing

Policies Monitored:

S05

Level:

Core

Frequency: Annually

Source:

Ceredigion County Council (CCC)

Target	Indicator	Trigger and Actions	Performance (1 st April 2007 – 31 st March 20	
			Nature of performance	Significance
1,100 Affordable Homes Completed (70 per annum) by 2022.	 The number of net additional affordable and general market dwellings permitted since (1st April) 2007. The number of net additional affordable and 	Further investigation will be undertaken on this indicator if the outstanding consents/completions of units of affordable housing over a 2-year period fall below the annual required level.	Net additional permitted: Affordable Homes: 954 General Market Homes: 2507* Total Homes: 3461*	0

general market dwellings completed since (1st April) 2007.	Critical to this investigation will be an understanding of the delivery of housing overall (see AMRH06 above). Response to this target may need to be undertaken in collaboration with the Housing Department and other housing stakeholders, such as RSLs.	*Years previous to 2020 included permissions before 01/04/2007 Completed: Affordable Homes: 711 General Market Homes: 2240 Total Homes: 2951	
--	--	--	--

The policy requirement for Affordable Housing is for 20% of all units to be affordable. The results are positive with more than 20% of all homes being permitted (954 homes (38%) and completed (711 homes (32%) being affordable since plan start. The target of 1,100 affordable homes permitted and completed is greater than 20% of all homes.

This slow delivery of Affordable Housing is a reflection of low delivery of general market housing and allocated sites in general. Further, completions are somewhat outside the control of the LDP as they are complicated by external factors including lack of market demand, the type of builders operating in the county, the limited commercial finance available to small builders and the

cautious approach of mortgage companies to house purchasers, as well as implications of NRW phosphate guidance constraining development in large parts of the county.

Conclusions

The percentage of affordable homes permitted and completed is greater than 20% of all homes which is positive and the average annual completion rate of affordable homes whilst below the 70 per annum target has remained stable or increased since plan adoption. Whilst the identified target of 1,100 affordable homes being completed by 2022 was not achieved, again due to the incorrect population projections the LDP was predicated on, it is extremely positive that 20% of all housing completions being affordable has been achieved and exceeded.

Actions

The LDP revision (and associated evidence including an updated Strategic Viability Assessment) will consider housing delivery (including affordable housing delivery). This alongside changes in the overall housing requirement mean that the affordable housing target will be revised in LDP2 but reflecting the excellent delivery that had been made in LDP1.

	need to be made by the	
	District Valuer Service of the	
	equivalent % Gross	
	Development Value.	

The identified target has been met. Since 2007 38% of all permitted dwellings are affordable units.

Notwithstanding the above, there continues to be a number of applications for residential development where a viability challenge is mounted. The number of sites where the challenge was successful was 3, which equates to 100% of all challenges being successful.

Of the 2 viability challenges to the affordable housing policy S05, 3 were on conversion, change of use or redevelopment/restoration applications. It is acknowledged that conversions, changes of use and redevelopments are costly to undertake, and therefore it is not surprising that the viability of these scheme was compromised. In terms of the new builds this has decreased this year but still remains a concern and the reasons for this appear to be the continued scale of the dwellings proposed being high quality, large dwellings which are costly to develop and the general slowdown of the market and poor viability in certain areas of the county.

Conclusions

The target is currently not being met given that 20% of all housing developments have received a viability challenge however there is no concern over the implementation of the LDP's policies due to the nature of the type of developments being challenged.

Actions

An updated strategic Viability Assessment will need to consider these issues including the cost of conversion, redevelopment and restoration applications and make specific recommendations which will inform policy revision, including specific reference to the threshold above which an affordable home contribution should apply taking into account any developer required contributions to off-site phosphate mitigations.

	expire	d permissions.

The target identified requires the ratio of affordable housing types to be: 9% DFS 70%:32% DFS 50%:59% Social Rent since the start of the plan period. The actual performance of commitments (outstanding consents not completed): is 57% DFS 70%: 2% DFS 50%, 2% Other DFS %'s, 8% 38% Social Rent and completions is 41% DFS 70%:1% DFS 50%, 1% DFS Other %'s, 56% Social Rent.

Since the adoption of the plan a number of changes have occurred which have meant that the tenure split suggested is out of date. These include the Welsh Government's focus on Welfare Reform and the updated LHMA (2020) which suggested a different mix of needs locally. Furthermore, the majority of AH completions and commitments have been commissioned by RSLs and are therefore

likely to have benefited from Social Housing Grant support. Therefore, whilst the tenure split of the policy is not being achieved, this has to do with its being out of date rather than a failure to deliver the housing needs of the county. The data demonstrates that affordable homes delivered by RSLs are meeting identified needs. In order to ensure that privately built affordable homes are also meeting the needs of the potential occupiers a housing needs statement has been produced that outlines the types of evidence applicants need to demonstrate to support a planning application. It is expected that consideration of the needs basis of individual applicants for AH in the assessment of any application for affordable housing will result in fewer AH outstanding consents.

It should be noted that delivery of IR units may not be entirely reliant on new permission being granted. There is a mechanism within the revised model s106 agreement which allows the owner of the AH property to apply to the Council to change the nature of the AH from a DFS to an IR. Therefore, some of the existing AH (DFS) stock could potentially become affordable housing for intermediate rent in the future.

Conclusions

The overall broad distribution of Affordable Housing is satisfactory. The performance of policy is therefore not of significant concern at present. The delivery of intermediate tenures should be monitored closely in future years. Evidence including the LHMA (2020) and currently being updated and whilst the tenure split proposed in the policy is not being met it is not a significant concern as the actual delivery of units aligns closely with the updated evidence of need – a matter for consideration through LDP Revision.

Actions

The tenure split will be further analysed following LHMA 2020 update (due mid 2024) using the Welsh Government Model.

	for sites within that Service	
	Centre will be triggered.	

Permissions to date indicate that development on:

9 allocations have exceeded the LDP's guide density (and

9 allocations are below the LDP's guide

The majority of applications relate only to part of an allocation and so whilst some exceed or are below the average unit density identified by the LDP, on balance, the average density is approximately 19.95 units per hectare. These applications represented only part of a whole allocation and were justified as appropriate in each case.

Conclusions

The average density of residential development coming forward on allocated housing sites (19.88 dwellings per hectare) is broadly consistent with the average LDP guideline density for allocated sites (23.60 dwellings per hectare). There are currently no concerns over the implementation of this policy.

Actions

Development plan policies are being implemented effectively.

completions, from a	permitted residential units to	decrease year on year, it will	5 outstanding consents to	
starting ratio of 6.5	residential completions."	be necessary to increase the use of shorter permissions,	every 1 completion.	

outstanding consents	mandatory completion dates	
to every 1 completion.	and completion notices. If	
	long build times are indicative	
	of reduced demand, it may	
	require the number of	
	permissions granted to be	
	decreased, as permissions	
	should exist to meet the	
	immediate needs.	

Average ratio across the County is 5 outstanding consents to every 1 completion, this is a decrease on 2022. However, year on year the figure remains highly variable and not a truly useful indicator. Completions are also complicated by external factors outside the control of the LPA including financing requirements, the lack of volume builders, the limited commercial finance available to small builders and the cautious approach of mortgage companies to house purchasers, as well as the impact of NRWs phosphate guidance on development in the Teifi catchment for example. This year's figure of 5 consents compares to 8 (2022), 6 (2021), 20.5 (2020) (data collection affected by COVID-19), 9.5 (2019), 14 (2018) 8.5 (2017), 7.1 (2016), 12.3 (2015) and 9.3 (2014).

The Council has undertaken research into outstanding consents and considered opportunities for issuing completion notices. Since adoption the authority has been issuing short permissions in response to this issue, however, the Council is also implementing LDP policy LU05 more stringently in relation to short permissions and completion date conditions.

Conclusions

The indicator is not a useful measure and demonstrates high variability.

Actions

Action should be considered through management of permissions including continued issue of short permissions and reluctance to renew unimplemented consents.

number since adoption.	the required dwelling type.	

The most recent LHMA (2020, which is still based on 2014 population projections) provides an update to the 2016 version which was considered in previous AMRs. The LHMA (2020) identifies that there is in terms of bedroom requirements, the greatest need for market housing is for 3 bed properties, whereas the greatest need for affordable homes is for 2 bed properties. The Strategic Housing Partnership consider housing needs and whilst increased provision of 1- & 2-bedroom accommodation was being achieved in recent years in accordance with the LHMA (2008), the impact of welfare reforms is yet to be fully realised but as time has moved on planning officers are negotiating a greater mix which should work through the system in the coming years.

Planning officers continue to work collaboratively with the Affordable Housing Team and RSLs to ensure that the type of market and affordable housing secured on sites matches the needs of the local community.

A new common housing register was launched in Ceredigion on 1st June 2016. Recent analysis of the register demonstrates that there is a significant need for 1- & 2-bedroom properties. An update of the LHMA 2020 is required in 2022 (using the 2018, population projections), however. The current LHMA is in the process of being reviewed and updated and should be available for the next AMR in mid-2024.

Conclusions

The target is not currently being met however there are no concerns over the implementation of the policy. In terms of dwelling sizes, Policy LU02 is still considered to be fit for purpose.

Actions

The need for accommodation for elderly persons will be factored into the LDP revision and may result in a change/addition to policy LU02 or LU04 to address the issue of an aging population and emphasize the need for suitable accommodation as part of the housing mix on housing sites.

sites should be		annual indicator will be taken	
permitted or		collaboratively with the	
completed by 2022.		Council's Economic	
		Development Department	
		and Welsh Government	
		DE&T.	

The target of 100% of allocated sites to be permitted or completed by 2022 has not been achieved, however 81% has been permitted and 61% completed by the end of the monitoring period. There is no change on the figures for 2023. It is noted that most of the completions recorded were completed prior to the adoption of the LDP as many of the LDP's employment allocations have been identified in order to allow for the co-ordinated redevelopment and/or rationalisation of their existing uses.

There are no concerns over the level of employment development in general which in recent years has experienced a general slowdown in the economy which supports a likely reduced overall requirement for employment land. The Council has undertaken an employment land review, and is working with regional partners on a larger than local employment needs assessment which

investigates the reasons for the lack of uptake of some employment allocations and considers what the demand is for future allocations in Ceredigion.

Conclusions

The LDP review will consider the updated Economic evidence base currently being prepared which is considering future employment land needs and reviewing employment allocations.

Actions

Development plan policies are being implemented effectively.

Analysis

According to the Mid Wales Region Employment Sites and Premises Needs and Action Plan April 2020 (B.E. Group for Powys, Ceredigion & Bannau Brycheiniog National Park), the recommended land needs for Ceredigion to 2040 for B1, B2/8 uses is -

8.53ha, however while overall employment numbers are forecast to decrease, some sectors are projected to increase over the forecast period and it may not be straightforward to convert floorspace from declining sectors to meet the needs of the growth sectors. Taking the growth in other sectors the increase in the need would be 1.99ha. The target of 40% of economic development to be located on allocated sites continues to be met, with 50% of units being permitted and 50% being completed on allocated sites and hence indicating that at present the LDP's allocated sites are operating as desired.

Conclusions

The amount of allocated employment land is sufficient to cover the plan period and forecasted need. The targets are currently being met and there are no concerns over the implementation of the policies.

Actions

Development plan policies are being implemented effectively.

	completed on previously developed land		
	(brownfield		
	redevelopment and conversions) expressed		
	as a % of all development completed.		
Analysis			

Analysis

Being a rural county with little brownfield land available for development, greenfield land will inevitably contribute towards a high proportion of total developable land. More than 30% of all economic development permitted and completed has been on brownfield land since the start of the LDP process with 51% permitted (12.50ha) and 51% (9.93ha) completed. The target has therefore been met and there are no concerns about the implementation of the LDP Polices.

Conclusions

The indicator is being met. There are currently no concerns about the implementation of the LDP's policies.

	in a Rural Service	facilities, any net loss would need to be		
	Centre.			

	taken into consideration in the wider	
	context.	

Analysis

Results pertaining to the number of key facilities in Rural Service Centres since adoption have been fairly constant. Whilst it is noted that there has been minor variation in the number of some facility types, detailed analysis has identified minor errors in survey classifications and historic reporting.

Further, there is some concern that the monitoring and performance figures are somewhat deceiving, for example where key facilities are located outside defined settlement boundaries, e.g., in Pontarfynach and Bow Street the data used to measure performance does not wholly reflect changes to uses since the amenities survey was established. In order to manage these corrections and develop a more robust protocol for reporting a review of key facilities will be conducted and utilised to inform the review of Service Centres and the overall settlement strategy as part of the LDP Review and Revision.

There has been no significant variation in the numbers and types of facilities in Rural Service Centres in recent years. The vitality of Rural Service Centres in general will be considered as part of the LDP Review / Revision.

Conclusions

There has been little change to provision of key facilities in the RSCs since adoption, there are therefore no major concerns regarding the implementation of the LDP policies.

S0308 Bridge Street West:
61.5%
S0309 Bridge Street East:
66.7%
Combined: 47.5%
Combined: 47.5%

Analysis

Empty units have been included in the percentage calculation this year, which has caused variations in the percentages.

The combined secondary frontages in Cardigan is meeting the required policy target 50% (Secondary), and Aberystwyth has dropped to slightly under at 47.5%. The primary frontage in both Aberystwyth (66.7%) and Cardigan (70.6%) are slightly under the 75% target.

In Aberystwyth for Primary Frontages, the proportion of A1 retail uses varies from between 77.8% to 33.3%; for Secondary Frontages between 66.7% and 20%. In Cardigan for Primary Frontages, the proportion of A1 retail uses is 58.3% in one frontage & 81.5% in the other primary retail frontage areas, for Secondary Frontages varying between 91.7% and 35.7%.

It should also be noted that the (adopted) indicator monitors the performance of A1 uses only. Policy LU21 defines retail as A class and not A1 specifically and the policy is applied as such. If you were to consider A class uses (and not only A1) all Primary and Secondary retail frontages in both Aberystwyth and Cardigan would be well in excess of the 75% and 50% requirement.

When considering A class uses (including use classes A1, A2 and A3), primary frontages in Aberystwyth range from 76.19% – 100% (combined 83.84%) and in Cardigan 92.59% – 79.17% (86.3% combined) and secondary frontages in Aberystwyth range from 55.56 – 192.31% (combined 81.3%) and in Cardigan range from 42.86 – 94.44% (combined 82.7%). This picture indicates that all frontages are all exceeding required policy targets.

As part of plan review, consideration will be given to whether these frontages are appropriate and / or whether the targets are realistic and/ or whether a different measure would best show the performance of the primary and secondary frontages. Particularly given the changing nature of the British high street where leisure and recreation uses are as an important a driver of economic growth as traditional A1 retail shop space frontages.

Conclusions

Retail has been impacted significantly by the Covid 19 pandemic and there has been significant local concern over the closure of multinationals chains on the high street, however it is pleasing to see a number of businesses have opened since the pandemic and the vacancy rates countywide remain stable bucking the national trend. Given that Policy LU21 defines retail as A class and

not A1 specifically and the policy is applied as such there are no concerns of the implementation of polices. Significant policy work has been directed to town centre regeneration team during the LDP pause with place plans, regeneration plans, conservation area appraisals and management plans and marketing and branding plans developed. It is hoped that this alongside the Transforming Towns grants and Shared Prosperity Fund bids for town centre renewal will continue to ensure Ceredigion towns buck the high street slump witnessed elsewhere.

allocated land to be		All Other Development	
located on greenfield		(Target 15%)	
land.			
		Permitted: 74.44ha (67%)	
		Completed: 48.52ha (64%)	

Analysis

Being a rural county with little brownfield land available for development, greenfield land will inevitably contribute towards a high proportion of total developable land and the indicator's targets were designed to reflect this.

The 75% threshold set for residential development has been met for development permitted, however it has not been met for development completed. The difficulty with this indicator is that the LA has no control over the planning permissions once granted. Many of those permissions being completed during the plan period would have been granted prior to adoption of the LDP and therefore prior to the LPA being able to influence the location of development in favour of brownfield sites.

The targets for economic development permissions been met, with 23% of development permitted however 46% of economic development was completed, on greenfield land.

The target for other development has been exceeded but given the community/economic benefit realised in relation to 'other development' it is not considered cause for concern.

In summary the majority of targets identified for this indicator are being met. Those development targets not being met are not considered cause for concern.

Conclusions

Residential and Other Permissions targets are not being met. Economic Development permissions have met the target.

Notwithstanding, an analysis of the other developments suggests that they are appropriate in scale and in their given locations and therefore there are currently no concerns about the implementation of the LDP's policies.

Actions

Council's main focus will remain with applications received and how they translate into deliverable permissions more so than on completions which are largely outside the control of the LPA and may have been permitted under a different set of planning policies to those set out in the LDP.

		an investigation into the	space provision in line with	-
		barriers to deliverability of	Policy LU24.	
		these aspects on site will be		
		triggered.		

Analysis

7 relevant planning applications were received during the monitoring period. 2 included provision of open space in accordance with Policy LU24 and 5 did not. Of the 5 that did not comply, 2 applications were for sites with 5 or less dwellings.

Conclusions

28% (2) planning applications provided open space in line with Policy LU24. Whilst the target is not being met there are no concerns over the implementation of the policy. The LDP review will need to consider open space provision in general and the policy requirements.

Actions

No concerns due to the rural nature of the County. Continue to monitor.

Monitoring Reference: AMRQ04

Aspect Monitored: Environment and Local Biodiversity

Policies Monitored: DM15, DM20 and DM22

the environment and	Ecological connectivity;	whether the LA can address	
local biodiversity.	 Trees, hedgerows and woodlands of visual, ecological, historic, cultural or amenity value; or Ecosystem services and natural processes. 	the issue.	

Analysis

Of the 527 applications permitted during the monitoring period (other than display of signage but including applications for variation and removal of conditions), 46 applications (8.7%) were approved despite there being unknown impacts as no ecology response had been submitted.

For those applications that ecology was consulted on, conditions were requested for 260 applications (87.5%). 5 applications (1.9%) were permitted without the inclusion of either some or all of the recommended ecology conditions, and hence they were also permitted despite potential impacts being unknown. Conditions preventing work during the bird breeding season, and requiring low levels of external light to allow best to continue to use a site, were not included.

In order to reach our target for 2023/24 it is proposed that:

- Implementation of the PPW chapter 6 amendments will be monitored closely
- Communication with Development Management Officers is undertaken to discuss the monitoring results and highlight the importance of incorporating ecology conditions as required;
- The ecologist continues monitoring quarterly to identify any trends early and limit opportunities for non-compliance with the identified target.
- The ecologist monitors all applications validated to ensure ecology is consulted where necessary.

Conclusions

The target of 5% has not been met this year, however, there has been a slight improvement on the previous year, Resources in the ecology department have been constrained in capacity due to the increasing burden of HRAs as a result of the NRW phosphate guidance and as such a delay in responding to everyday consultations is inevitable.

Actions

DM20 and DM22.	woodlands; or	whether the LA can address	DM22.	
	Ecosystem services and natural processes as required in accordance with Policies DM14, DM15, DM20 and DM22.	the issue.		

Analysis

260 (87.84%) of all planning applications consulted on by ecology during the monitoring period were required to include an environmental enhancement.

Of these 260 applications, 232 (89.23%) applications were permitted subject to relevant environmental enhancement conditions and a further 20 (7.69%) applications included environmental enhancements on the approved plans. Environmental enhancements were not required for all applications e.g., variation or removal of conditions, or where the site or development did not have a suitable environment for enhancements.

Quarterly monitoring in 2022 - 2023 and further communications with officers and agents will ensure that the target is met, and preferably exceeded, over this period. The ecologist will encourage officers, agents, and applicants to include environmental

enhancements on plans to prevent including enhancements as a condition. The condition will be re-worded as a compliance condition. The requirements of the new chapter 6 of PPW will be implemented.

Conclusions

The target has been met.

Actions

No action required, continue to monitor.

	alternatives (AMP, other sites	
	etc.); and	
	Where capacity issues cannot	
	be overcome, considering the	
	options for addressing future	
	development needs within that	
	particular Service Centre.	
Analysis		

Analysis

Welsh Water are currently delivering their AMP7 (2020 - 2025) there has been no change in the reduction in outstanding infrastructure issues this year. 3 Service centres are partly constrained, compared to the same 3 in 2018 & 2017, 4 in 2016, 5 in 2015 and 9 in 2014. Of the 3 service centres that are constrained in part, the following is noted:

• Llwyncelyn Waste Water Treatment Works (WwTW) has no capacity to accommodate further growth in Llwyncelyn (other than that with extant consent).

- Llanrhystud WwTW has no capacity to accommodate growth proposed in Llanon and Llanrhystud (other than that with extant consent).
- Whilst not Service Centres, there is no capacity available at Llanfarian WwTW (serves Llanfarian and Blaenplwyf), and Rhydyfelin WwTW.

Whilst the delivery of phosphate related schemes at Lampeter WwTW and Llanybydder WwTW (serves Llanwnnen and Alltyblacca in Ceredigion) has been brought forward from AMP8 To AMP7 (by March 2025), no improvements on WwTW capacity are planned.

Prior to programmed regulatory investment, sites can come forward in the short term should developer's funds improvements themselves.

Although not within the monitoring period, in September 2023, Ceredigion County Council were notified by DCWW that no further development could be permitted in Cardigan without a condition restricting occupation until 2027 due to the upgrade works required at Cardigan WwTW. It has since been demonstrated that DCWW were aware of the failure of the WwTW and that of Llanfarian WwTW for many years.

Conclusions

Engagement in early parts of the plan period with DC/WW were positive. Since the beginning of the plan period the number of service centres that are constrained in part have reduced from 9 to 3. However, no significant work on capacity within service centres has been undertaken since 2017 and despite DCWW knowing about capacity issues in several WWTPs countywide for some time engagement with the LPA has been lacking in recent years.

Actions

The LDP review, as part of the candidate site process will consider any site-specific infrastructure issues. This will ensure that any allocations to come forward in a replacement LDP are deliverable.

	waste.		

A 48,500-tonne capacity, 3.0MW AD facility at Stormy Down, Bridgend, operated by Severn Trent Green Power (Bridgend Ltd), opened in December 2016, continues to receive food waste collected by the Central Wales Waste Partnership, including Ceredigion Council. The operators Severn Trent Green Power (Bridgend) Ltd obtained a planning permission in March 2022 to increase the permitted tonnage to 95,000 tonnes per annum.

Ceredigion is currently sending its residual waste to LAS in Lampeter. The Contract expires in 2022 with an option to extend for a further 2 years. Long term collaborative options continue to be explored.

To address the vacuum TAN21: Waste (2014) required that a lead authority within each of the three RWP areas prepare an annual monitoring report for the region. Carmarthenshire CC has taken responsibility for this, and the latest Waste Planning Monitoring Report for South West Wales covers the period 1st April 2021 to 31st March 2022. The Report confirms that the South West Wales Region has sufficient landfill void space to meet the requirements set out in TAN21 and that at the present time the management of residual waste and food waste is being adequately catered for.

Conclusions

The LPA will draw on collaborative waste planning and monitoring work to inform Plan Review / Revision when it re-starts.

Actions

Development plan policies are being implemented effectively.

	into whether the output is		
	constrained by anything that		
	might be addressed through		
	the LDP, or is simply a		
	reflection of demand.		

The SWRAWP RTS 2^{nd t} Review sets Ceredigion an annual crushed rock apportionment of 0.272Mta to run to the end of the Plan period plus ten years beyond (i.e., to 2032)- a total of 6.798 million tonnes. It also sets a land-won sand and gravel apportionment of 0.188 million tonnes per annum to run to the end of the Plan period and seven years beyond (i.e., to 2029 for Ceredigion) a total of 4.136 million tonnes. RTS2 does however require collaborative work in the provision of land won sand and gravel reserves collectively between Ceredigion, Pembrokeshire, Carmarthenshire and Pembrokeshire Coast National Park Authority to achieve a joint 6.792 million tonnes of land won sand and gravel apportionment target outside of the PCNP.

In 2020 sales of crushed rock aggregates in Ceredigion were 0.088Mt, 32% of the target 0.272Mt apportionment. The 10-year average sales 2011 - 2020 are also below the apportionment figure of 0.272Mta at 0.15Mta. Figures taken from the 2020 Annual survey returns indicate that Ceredigion had around 5.42Mt of crushed rock reserves at the end of 2020, so if average sales were to continue to progress at the current 10-year average sales, these reserves would last until 2056. This is far longer than the

landbank requirement set in MTAN1, but less than the 6.798 million tonnes required in RTS2. Given the very low sales average over the last 10 years there is little danger of reserves being exhausted before the LDP Review and the next RTS (due in 2025).

In 2020 the total sales of land-won sand and gravel in Ceredigion was 0. 04Mt. This is 24% of the target 0.188Mta apportionment. The 10-year average sales 2011/2020 are also below the annual apportionment figure of 0.188 million tonnes at 0.09 million tonnes. Figures taken from the 2020 Annual Survey returns indicate that Ceredigion has around 0.50 MT of sand and gravel reserves at the end of 2020, so if average sales were to progress at their 10-year average level of 0.04 Mta the reserves would last until 2031. However, if the LDP allocations at Penparc and Pant quarries are delivered they would add approximately 2Mta to the reserves which at the current 10-year average sales rate of 0.04 Mta would add 40 years to the landbank. The trend in sales suggests that the 10-year average sales will continue to reduce over time especially due to the concrete industry increasing the use of sand alternatives and the switch in supply at one site to non-aggregate production. Given the very low average sales over the last 10 years there is little danger of reserves becoming exhausted before the LDP Review and the next RTS due in 2025.

As required by RTS2, representative officers of the South West Wales Minerals Planning Group of authorities meet regularly to discuss cross boundary minerals issues, including the requirement for a Statement of Sub-regional Collaboration. The Group has sought to establish from the minerals industry whether there are any reserves of sand and gravel within the region that they have identified for future provision, but to date no sites have come forward. Three candidate sites have been submitted to Pembrokeshire County Council and One Candidate Site were submitted to Ceredigion County Council for consideration in their respective LDP Reviews, but a full assessment of the suitability of the sites has yet to be made, with work on Ceredigion's LDP temporarily paused for as yet unspecified time.

Monitoring Framework Local Development Plan

Conclusions

No action is currently required and any issues can be adequately addressed in the LDP Review at re-start.

Actions

Development plan policies are being implemented effectively.

4. Results of SA/SEA Indicators

Monitoring the LDP also accords with the requirements for monitoring the sustainability performance of the plan through the Strategic Environmental Assessment / Sustainability Appraisal (SEA/SA). This Section 5 includes monitoring the SA/SEA for the period 1st April 2022 – 31st March 2023. Indicators have been identified to assess the performance of Sustainability Objectives.

As a visual aid in monitoring the effectiveness of policies and to provide an overview of performance, key indicators and outcomes are highlighted as follows:

Significance	
of	Description
performance	
+	Targets are being achieved.
?	No conclusion can be drawn at this stage.
0	Targets have not been achieved but no concerns over implementation of policy(s).
-	Targets are not being achieved and there are concerns over implementation of policy(s).
N/A	Not applicable

The monitoring framework includes reference to other organisations and other plans and strategies which may have a proactive influence on the implementation of policies.

The monitoring process is dependent upon a wide range of statistical information. Certain circumstances have led to changes to the original Monitoring Framework. Any changes are detailed in Appendix 1 of the report.

Sustainability Objective: 1a Reduce greenhouse gas emissions in both existing and new development.

Gas:106.55 GWh Total Consumption of Domestic Electricity and Gas: 258.25 GWh	Consumption of Domestic	
Domestic Electricity and	Gas:106.55 GWh	

In 2021 total annual greenhouse emissions estimates in Ceredigion were 363.9 CO₂ (Kt).

Fourteen permissions were granted for the monitoring period for renewable energy development.

Ceredigion's ecological footprint was last recorded in 2015 as 3.59 (gha/c). The rural nature of Ceredigion will continue to affect its ecological footprint due to its rurality and a combination of limited public transport and heavy reliance on private transport to access services. Access to public transport is limited and therefore there is a greater reliance on private transportation.

Conclusions

Ceredigion is providing a level of renewable energy helping Wales meet its national renewable energy target. The LDP continues to reduce greenhouse gas emissions in both existing and new development. The results of the currently being undertaken Local Area Energy Plan will be factored into any future LDP review.

Sustainability Objective: 1c To reduce flood risk

			systems. It is therefore no	
			longer necessary for the	
			LDP SA/SEA monitoring	
			framework to include these	
			indicators.	
Analysis				

On 7th January 2019 a new service was introduced by Ceredigion County Council to deliver the statutory legislation enacted by Welsh Government under the Flood and Water Management Act 2010.

This legislation applies to ALL new developments of more than 1 house or where the construction area is 100m² or more.

A Sustainable Drainage Body (SAB) was set up in Ceredigion and it manages all the aspects of technical approval of sustainable surface water drainage systems. It is therefore no longer necessary for the LDP SA/SEA monitoring framework to include these indicators.

Conclusions

The SAB body has been established and through the regulatory framework are assessing the relevant applications as the indicator demonstrates all applications in a C1 or C2 floodplain bar 1 met the TAN 15 tests therefore no further action is required at this time.

Sustainability Objective: 2a Minimise contamination and safeguard soil quality and quantity.				
			Performance	
Indicator	Source	Frequency	(1 st April 2007 – 31 st M	arch 2023)
			Nature of performance	Significance
Amount of new development (ha) permitted on previously developed land (brownfield redevelopment and conversions) expressed as a % of all development permitted.	Ceredigion County Council	Annually	Since the start of the LDP period, the following proportion of permitted applications have been on brownfield land:	+
			34% (160.08)	
Amount of new development (ha) completed on previously developed land (brownfield redevelopment and conversions) expressed as a % of all development completed.	Ceredigion County Council	Annually	Since the start of the LDP period, the following proportion of completed development has been on brownfield land:	+

			25% (80.87ha)	
Average density of housing	Ceredigion County Council	Annually	The average density of	
development permitted on allocated	(AMR Indicator H13)		housing development	
development plan sites.			permitted on allocated LDP	?
			sites is 19.95 units per	
			hectare.	

Analysis

Being a rural county with little brownfield land available for development, greenfield land will inevitably contribute a high proportion of total developable land. However, a percentage of brownfield land has been developed every year since adoption. AMR indicator H09 sets a target for residential development on previously developed land as 5%. This indicator shows that in excess of 20% of development is being secured and delivered on brownfield land for all types of development which is positive. The average density of development on LDP allocated sites is broadly consistent with the LDP guideline density for allocated sites of 23 units per hectare.

Conclusions

Despite having only, a low level of brownfield development, there are currently no concerns about the implementation of the LDP's policies as they encourage the use of brownfield development where appropriate. The average density of development on LDP

allocated sites is lower than the average LDP guideline density of 23 units per Hectare, however this fluctuates regularly and has been justified on a case-by-case basis. The LDP continues to minimise contamination and safeguard soil quality and quantity.

Sustainability Objective: 2b To maintain and improve air quality across Ceredigion					
Indicator	Source	Frequency	Performance (1 st April 2022 – 31 st M Nature of performance	-	
Levels of key air pollutants (e.g., NO ₂ , PM ₁₀ , Benzine, ozone).	Ceredigion County Council's Air Quality Progress Report 2023 was prepared and submitted in 2023 and considers Air quality data from 2022	Annually	NO2: An annual mean standard of 40µg/m3 was not exceeded at any of the key monitoring / worst case and road-side locations in Ceredigion in 2022. Standards were in fact well below this limit every month monitoring was undertaken. Concentrations of NO2 continue to comply with the	0	

First European Air Quality	
Directive and domestic	
legal standards.	
PM ₁₀	
No new monitoring of	
particulate pollution was	
undertaken in 2022.	
Modelled background	
PM10 concentrations in	
Ceredigion in 2022 were	
estimated to be below	
13µg/m3 as an annual	
mean. Concentrations	
even at the worst case,	
roadside and hot-spot	
locations in Ceredigion	
were predicted to be well	
below annual PM10	

standard of 40 µg/m3 also.	
Benzene	
No new monitoring of	
Benzene was undertaken	
in 2022. Modelled	
background Benzene	
concentrations in	
Ceredigion in 2022 were	
estimated to be below	
5µg/m3 as an annual	
mean, in compliance with	
mandatory standards for	
benzene.	
Ozone	
The Air Quality Standards	
Regulations 2010 set the	
target that that a three-	
year average of 8-hour	
mean concentrations of O3	

	should not exceed 120	
	μg/m3 more than 25 times.	
	Modelled background	
	Ozone concentrations in	
	Ceredigion in 2022	
	indicated that this limit was	
	exceeded no more than 5	
	times in 2022 which allows	
	us to estimate that	
	Ceredigion will satisfy the	
	target of these regulations	
	within the coming years	
	should we see a	
	continuation of this rate.	
Analysis		

Last year's air quality monitoring identified similar levels of air pollutants as observed in 2020, with all standards being complied with in that no mean levels in relation to NO2, PM10 or Benzene were exceeded. Air quality levels will continue to be monitored in future to ensure continual compliance with these legal standards.

Conclusions

Ceredigion continues to experience some of the best air quality standards in Wales and there is no data to indicate that any LDP policies have had a detrimental effect on Air quality in our local authority area.

Sustainability Objective:	2c Minimise the adverse effect quantity and quality	sto or larra doo	on inland and coastal water r	00041000
Indicator	Source	Frequency	Performance (1 st April 2022 – 31 st March 2023)	
			Nature of performance	Significance

	Gwyn: Excellent	
	13.Penbryn: Excellent	
	14.Tresaith: Excellent	
Analysis		

Analysis

Water quality is tested 20 times during the bathing water season from 15 May to 30 September each year. These samples are analysed against the standards laid out in the European Bathing Water Directive. Of the 14 beaches assessed in 2022 10 were classified as 'Excellent', and 4 as 'Good'.

Conclusions

71.4% of the assessed beaches within Ceredigion are measured as meeting 'Excellent' standards of the European Bathing Water Directive and the remaining 28.5% meeting 'Good' standards. LDP policies help support this by seeking to ensure that development does not pollute water bodies.

returns-data-interrogator		

Analysis (Provisional)

The authority met its Local Authority Recycling Targets (LART) and *landfill diversion targets.

Ceredigion is currently sending its residual waste to an Energy from Waste facility under contract to LAS Recycling in Lampeter up until 2022 whilst a longer-term solution is sought.

All the source segregated food waste collected by the Central Wales Waste Partnership including Ceredigion is sent to an out of County Anaerobic Digestion (AD) facility, which contributes significantly to the authority's current success in meeting both the LART and landfill diversion targets.

Although the Council continues to meet the recycling/composting targets the authority remains committed to meeting the progressively more challenging targets that lie ahead, and is committed to driving the management of waste further up the waste hierarchy in line with national and European policies To do this, to date the authority has successfully relied upon (i) the existing waste sites within Ceredigion, (ii) the availability of land allocation E0301 on the Glanyrafon Industrial Estate, (iii) regional scale facilities located outside of Ceredigion and (iv) any new sites that might be developed under the permissive waste policies contained within the LDP.

The land allocated under E0301 has the capacity to meet any foreseeable future need for any regional resource recovery or waste treatment facility to serve the Central Wales Waste Partnership Area, or alternatively to serve as a component element within a

broader longer term Central and West Wales residual waste solution area. Whether or not the E0301 site is ever selected as a regional waste site the use, or continued availability of site E0301 should, when taken together with any other land that might become available for resource recovery and waste facilities under LDP's permissive waste policies enable Ceredigion to accommodate the full range of resource recovery and waste infrastructure that might be needed, whether it be for the municipal waste that the authority is responsible for or commercial and industrial waste that is managed by the private sector, sufficient to meet or exceed all present and foreseeable waste targets.

** Total Household/Industrial and Commercial waste includes Municipal waste.

Conclusions

There are currently no concerns about the LDP's effect on Ceredigion's capacity to keep within the Beyond Recycling Indicators, or to exceed the Local Authority Recycling Targets (LART)

Sustainability Objective: 3b Build and maintain environmentally friendly, high-quality services and infrastructure					
			Performance (1 st April 2022– 31 st March 2023)		
Indicator	Source	Frequency			
			Nature of performance	Significance	
The number of Service Centres	Ceredigion County Council	Annually	3 Service Centres		
constrained by infrastructure issues	(AMR Indicator Q06)		constrained by		
(Sewage treatment and water			infrastructure issues	0	
supply).			(Sewage treatment and/or		
			water supply).		

Engagement with DCWW is ongoing. Since the beginning of the plan period the number of service centres that are constrained in part have reduced from 9 to 3. Refer to AMRQ06 above for further details.

Conclusions

Engagement with DCWW is ongoing. Since the beginning of the plan period the numbers of service centres that are constrained in part have reduced from 9 to 3. The LDP review and revision, as part of the candidate site process will consider any site-specific infrastructure issues. This will ensure that any allocations to come forward in a replacement LDP are deliverable. However, it is

important to note, given the Phosphates concerns on the river Teifi further work on engagement is needed and is ongoing with DCWW to manage the discharges of the WWTPs which account for 68% of the phosphates in the Afon Teifi.

Sustainability Objective: 4a To value, conserve and enhance biodiversity.						
			Performance (1 st April 2022 – 31 st March 2023)

Loss of sites (ha) that meet SINC	Ceredigion County Council.	Annually	1.93% application led to a	
criteria due to new development.			loss of sites that meet	0
			SINC criteria (scrub).	

Analysis

8.7% of development was permitted where there are predicted to be significant residual long-term effects on the environment and local biodiversity. 89.23% of development was permitted to include environmental enhancements in accordance with the requirements of Polices DM14, DM15, DM20 and DM22. 46 applications for development have resulted in a loss of priority habitat (due to loss of hedgerows without the inclusion of a condition relating to replanting or translocation of the lost hedgerow).

The monitoring highlights that for the most part indicators are being met and hence biodiversity is being valued, conserved and enhanced. Notwithstanding actions have been identified to further support policy implementation and improve performance for the next monitoring period. For further information refer to LDP Indicators Q04 and Q05 above.

Conclusions

Whilst the objective has not been met, actions have been identified to support better performance moving forward and it is positive to note that on almost 90% of permitted applications environmental enhancements were included.

Sustainability Objective:	5a To understand, value, protect, enhance and celebrate Ceredigion's landscape, environment, diversity, and local distinctiveness, historic and cultural heritage

Units: 4 (8%)	
Non-residential	
Development Completed:	

	Hectares: 1.17 (6%)	
	Units: 4 (4%)	

Analysis

Ceredigion is home to a rich, diverse and highly valued landscape. Consequently, around 45% of its land area has been deemed of high enough quality to afford designation as part of Special Landscape Areas (SLAs), of which there are thirteen. It also has around 15% of its land identified as being of Outstanding value according to LANDMAP's Visual and Sensory Methodological Chapter, making it of national or even international importance.

It should be noted that neither the SLA designations nor the outstanding LANDMAP evaluations necessarily preclude development and that many forms of development will have no effect on landscape. It should also be noted that where development does occur within SLAs and other highly valued landscapes, then the policies of the LDP can be used to require a higher quality of design and landscaping.

Conclusions

There are currently no concerns about the LDP's effect on Ceredigion's most highly valued landscapes.

Sustainability Objective:		Maintain distinctive cultural identity and ensure the needs of the changing demographics are reflected; and				
	6b Build vibrant, safe and cohesive communities.

	Sexual Offences
	(Offences): 270
Analysis	

Analysis

In respect of Affordable Homes, the percentage is above the required target of 20% for both permissions and completions. See AMR Indicator H10 for further details.

In respect of services and facilities in Service Centres, there has been little variation in the numbers of key services and facilities in recent years and given the structural changes occurring as a result of the Covid-19 pandemic it is difficult to assess how the LDP has influenced services in settlements with year-on-year changes showing variability. See AMR Indicator E06 for further details.

In 2023 (All categories of offence have increased except drug offences)

Conclusions

The AMR suggests that the proportion of Affordable Homes permitted and completed is making a positive contribution to the maintenance of the distinctive cultural identity of the County in a way that is responsive to a range of needs by enabling access to housing for local people in affordable housing need for both private and social housing sectors.

There has been little variation since adoption of the numbers of key services and facilities in Rural Service Centres, deprived LSOA's and an increase in notable offences. The reasons for this are many and varied and outside the scope of how an LDP can influence policing and prosecution.

Sustainability Objective: 7a Promote and provide opportunities and services to maintain healthy communities.				mmunities.
Indicator			Performance	2
	Source	Frequency	(1 st April 2022 – 31 st March 2023)	
			Nature of performance	Significance
Proportion of dwellings within agreed walking/cycling distance (400m) of key health services.	Ceredigion County Council.	Annually	Proportion of dwellings within agreed walking/cycling distance (400m) of key health services: 13.81%	?
Proportion of new dwellings within 300m of their nearest natural green space.	Ceredigion County Council.	As Available.	Proportion of new dwellings within 300m of their nearest natural green space 37.9 %	?
Amount of new open space facilities (ha) provided.	Ceredigion County Council (AMR Indicator Q01 & Q03).	Annually.	In this monitoring period there has been no net gain	0

	of open space within the	
	county.	

Analysis

Many of the applications received during this monitoring period relate to sites already granted as outline under the Unitary Development Plan (UDP) and as such it has not been possible to require the development to provide open space in accordance with Policy LU24.

The proportion of dwellings within proximity to key health services is 13.81%. This is due to the rural nature of the county and historic population distribution.

The proportion of dwellings within 300m of natural green space is 37.9%. Refinement of the information on natural greenspace has enabled the collection of this data for the first time, and therefore no comparison can be made for monitoring purposes in this reporting period.

Conclusions

The LDP continues to promote and provide opportunities and services to maintain healthy communities.

Sustainability Objectives:	8a Promote, develop and imp	rove opportunit	ies for sustainable and enviro	nmentally
	friendly tourism, leisure an	d recreation fac	cilities within Ceredigion.	
Indicator	Source	Frequency	Performance (1 st April 2022 – 31 st M	-
			Nature of performance	Significance
Tourist days and Tourist numbers by i. Serviced Accommodation, ii. Non-Serviced Accommodation, iii. Staying with friends or relatives and iv. Day Visitors.	Ceredigion County Council http://www.discoverceredigion.c o.uk/English/footer/tradepartner site/toursismreportstatistics/Pag es/default.aspx	As Available	This information is for the 2022 calendar year and is the latest information available: 1.38 Million Total Staying Visitors including: • 218,000 persons staying	0
			in Serviced Accommodation	

1.06 Million persons	
staying in Non-Service	b
Accommodation	
109,000 persons stayir	g
with Friends or	
Relatives	
1.57 Million day visitors	i.

Analysis

There have been significant changes in total visitor numbers or visitor types since the Covid 19 pandemic lockdowns resulting in an overall increase across the board from previous covid years.

Conclusions

The suite of tourism polices in the LDP are considered to support the objective and the LDP continues to promote, develop and improve opportunities for sustainable and environmentally friendly tourism, leisure and recreation facilities within Ceredigion.

Indicator			Performanc	е	
	Source	Frequency	(1 st April 2021 – 31 st N	larch 2022)	
			Nature of performance	Significance	
Number and % of people aged 16-64 with NVQ qualifications.	https://www.nomisweb.co.uk/rep orts/lmp/la/1946157390/report.a spx?town=ceredigion%20- %20tabquals#tabquals	Annually. thresholds of 'Learning Providers'		23		N/A
by (i) walking (ii) public transport				
and (iii) car.				

Analysis

The LDP strategy continues to promote growth in sustainable locations. Changes due to school's modernisation will be factored into the LDP Review at re-start.

In Ceredigion as of last monitoring period for the data the numbers achieving NVQ qualifications has increased. Other qualifications have increased and no qualifications has decreased. When comparing Ceredigion to the Wales averages the Ceredigion population have higher levels of NVQ Qualifications and lower levels of Other Qualifications. Further, only 3.5% of the Ceredigion population have no qualifications compared to the Wales average of 8.2%.

Conclusions

There are no concerns over the LDP Strategy and policy in relation to the objective.

Sustainability Objectives: 10a Promote the use of the Welsh language.				
Indicator			Performance

Number and % of Ceredigion pupils who speak Welsh at home.	Ceredigion County Council	Annually	Data is for the academic year –2022 - 2023:	?

Analysis				
The number and % of pupils receiving a Teacher Assessment in Welsh (first language) at the end of Key Stage 3.	Welsh Government https://statswales.gov.wales (National Strategic Indicators)	Annually	Data for year 2022/2023: 450 pupils were assessed in Welsh out of a total of 655 pupils (68.6%)	?
	Or https://statswales.gov.wales/Cat alogue/Education-and- Skills/Schools-and- Teachers/Schools- Census/Pupil-Level-Annual- School-Census/Welsh- Language/speakingwelshhomep upils5andover-by- localauthorityregion-category		 Speaks Welsh at home: 2827 (34%) Does not speak Welsh at home: 3125 (37%) Not applicable (cannot speak Welsh): 2395 (27%) No information provided: 0 	

From the 2021 Census results, the percentage of Welsh speakers in Ceredigion fell from 47.3% in 2011 to 45.3% in 2021. In 2021, there were around 3,300 fewer Welsh-speaking Ceredigion residents (over the age of three years) compared with 2011. The number of people who did not speak Welsh decreased by 650. In March 2023 57.7% of people in Ceredigion could speak Welsh. This compares to 2022 (57.2%), 2021 (62.3%) 57.3% (2019), 59.6% (2018), 58.6% (2017), 53% (2016), and 52.3% (2015 and 2014) 54.3% (2013). The data reflects the year-on-year variability of this indicator, and no firm conclusions can be drawn.

Education data taken from Ceredigion's annual School Census and Welsh Government's National Strategic Indicator indicates there has not been a significant change in the number of children who do and do not speak Welsh at home or undertake school assessments in Welsh during the monitoring period.

Policy DM01 of the LDP requires that the impact of development on the Welsh Language and the Community is assessed in certain circumstances. To support the implementation of this policy an SPG was adopted on 23rd June, 2015. Following the adoption of the SPG the Council is also reporting the performance of Policy DM01 requirements for a Community Linguistic Impact Assessment (CLIA) in the annual Welsh Language Monitoring Report. However, this guidance does not necessarily reflect the latest TAN 20 and will need to be amended in accordance with the new policy during the review process.

Conclusions

Although the Census results indicate a 2% reduction in Welsh Speakers over the age of 3, the Stats Wales Annual survey of Welsh Speakers over the age of 3 has a year-on-year variability with an average of 56.46% over 10 years. The Census results may have also been impacted by the COVID-19 lockdown closing schools and moving to online learning. Causally linking linguistic change

and spatial planning is extremely difficult. Evidence above suggests that there has not been a significant change to Welsh speakers in Ceredigion in recent years.

Analysis

The impact of new residential development as a proportion of existing housing stock dispersed across the County is likely to be largely imperceptible on a year-by-year basis and in respect of some of the data; causal relationship between journey times and residential development is not easily identifiable. Analysing the data over a longer time period may however offer some indication as to the effects of the LDP.

In terms of travel times to key facilities, the results remain largely unchanged since adoption The % over 90 mins from key facilities by public transport has increased due to changes in the public transport network and frequency of services; however, the majority remain within 30mins travel time.

Conclusions

The AMR cannot draw any conclusions regarding the effect of the LDP at this point. It is likely that a year by year 'no change' scenario will persist and that substantive effects will not be identifiable until more development has come forward. Any significant changes should be the subject of analysis of potential causes beyond the impact of the LDP.

Analysis

While the economic recession caused the numbers in employment to drop from 69.6% in 2010 to 61.3% in 2011/2012, since then there has been a steady rise in numbers in employment. This monitoring period shows a increase in the proportion of economically active persons in employment from 74.1% (2021), 77.6% (2021) to 75.8% (2022). The proportion of economically active persons in employment may seem low, being lower than the UK (79.3%), but similar to the Wales (75.8%) average but Ceredigion has a relatively high student population, which contributed to a significant percentage of those individuals not in employment.

Monitoring Framework SA/SEA Indicators

Gross weekly pay for full time employees has increased slightly since the LDP was adopted. Further, given that the Ceredigion figures are derived from survey data for a small area, the year-on-year change may be more the result of sample variability than evidence of an actual change in income. Notwithstanding, wages in Ceredigion continue to be lower the Welsh and UK averages and the assumed growth is also below the average annual rate of inflation for this period.

In relation to the development of the LDP's allocated employment sites, 50% of their area is now committed for development and 50% of the units have been completed. Most of the completions recorded were completed prior to the adoption of the LDP as many of the LDP's employment allocations have been identified in order to allow for the co-ordinated redevelopment and/or rationalisation of their existing uses. This is a satisfactory situation, and reflects that employment land allocations are meeting the requirements of industry in the area.

Shop vacancy rates are highly variable between Town Centres. The average shop vacancy rate within Ceredigion's Town Centres is 14%. This figure compares to 13 (2022),10.7 (2021), 10.2% (2020), 9.7% (2019), in 2019 the rate for Tregaron was 3.3% (due to the small number of retail unit in Tregaron any change affects the percentage greatly). This is on a par with the UK vacancy average, from the British Retail Consortium at the end of Quarter 4 in 2022 at 13.8% & the Wales average 16.9 % First Quarter 2022 (Welsh Retail Consortium (https://www.gov.wales/shared-strategic-vision-retail-sector-

html#:~:text=Premises%20vacancy%20rate%20(Wales%20Retail%20Consortium%20figures)&text=shopping%20centre%20vacan cies%20decreased%20to,from%2012.2%25%20in%20Q4%202021.)). Therefore, with the exception of Llandysul (22.7%) all town centres are performing better than the Welsh national average and overall, the situation is a cautiously optimistic one, particularly as Aberystwyth, which is by far Ceredigion's largest shopping centre, has a vacancy rate of just 11.1%.

The total footfall recorded in 2022 was 10097 compared to the 2021 figure of 9842.

Conclusions

Despite the uncertainties, caused by the external factors (move to online shopping, Brexit, Covid-19, War in Ukraine) there is no evidence to suggest that the LDP is having a negative effect on the local economy and therefore, within the context of the SA/SEA, the overall effect of the LDP does not raise any concerns at the present time.

- 5.1 The findings of the 3rd AMR in 2016 triggered plan review. An LDP Review Report was prepared and consulted on. The Review Report set out the extent of changes required to the LDP identified in the preceding AMR's, updates to the evidence base and ongoing surveys. A delivery Agreement was prepared and submitted and signed off by Welsh Ministers, The Preferred Strategy consultation and two calls for candidate sites were undertaken. The Covid pandemic then stopped progress on the replacement LDP, followed by NRW advice on phosphate levels in riverine SACs in Wales. It was in October of 2021 that a formal pause was declared to the replacement LDP, this remains the situation to date.
- 5.2 In regard to contextual changes, new legislation, policy and external conditions which have been introduced during this monitoring period, no significant new policies or contextual changes have occurred. However as noted in the discussion and several AMR indicators significant policy contextual changes have occurred over the past three years which continue to impact; Including the Covid 19 pandemic and its structural changes on the work place and retail and the knock-on impacts on the housing market and in-migration. The publication of phosphates interim planning guidance within the Afon Teifi catchment which effectively places an embargo on development on 45% of the county. And the publication of Future Wales the National Plan 2040 and a revised PPW. With these in mind a whole new approach to the replacement plan will need to be undertaken and thus at present the replacement plan preparation is on formal pause and a new DA will need to be submitted. In the interim the existing plan remains compatible with Future Wales and PPW 11 and has a remaining allowance sufficient given the initial over provision to continue supporting development where sustainable for the medium term and has no formal drop-dead date.
- 5.3 In regard to the AMR Indicators, this year's results show that the plan is performing successfully across a range of areas. Of the 31 AMR Indicators 21 (68%) are meeting identified targets or where targets are

not being met there are no concerns over the implementation of polices. Only 9 29%) have been identified of concern and their performance is summarised in the following table:

Indicator	Policies	Performance	Comment
AMRH02 –	S01, S02, S03,		A less than positive movement has occurred towards the identified
Settlement Strategy	S04.		targets from plan adoption comparative to last year although the ratio is
Countywide		-	broadly consistent with the identified target.
			The LDP revision should consider the Settlement strategy and continue
			to identify ways to deliver housing in sustainable locations in line with
			Future Wales.
		-	
AMRH03 –	S01, S02, S03,		The results show a varied picture with some individual settlement
Settlement Strategy	S04.		groups moving towards and some moving away from the required
Settlement Groups			balance identified in Appendix 2 of the LDP.
		_	It is recommended that the LDP revision should consider the settlement
			strategy in general and specifically delegated and non-delegated
			planning application decisions by location (and specifically post plan
			adoption) and spatial distribution of growth need and delivery to better
			understand the spatial variations in balance across the County.

Indicator	Policies	Performance	Comment
			Changes to delegated authority as a result of the Audit Wales 2022
			report should also help to address these concerns.
AMRH04 –	S01,		50% of Linked Settlements have reached or exceeded their 12%
Settlement Strategy	S04		growth limit. It is noted that at the point of plan adoption in 2013 40% of
 Development in 			Linked Settlements had already reached or exceeded their growth limit
'Linked Settlements'			as a result of inherited planning approvals made under a previous
			planning regime. For all Linked Settlements which have reached or
		_	exceeded their 12% growth no further development should be permitted
			unless justified under Policy S04.
			The LDP revision should consider why there is a negative shift away
			from capacity limits across the county. Training with members and
			Development Management staff is being implemented to underscore
			this point.
AMRH05 –	S01,		34 dwellings with the application type Full or Outline were approved in
Settlement Strategy	S04		'other locations' during the monitoring period in accordance with the
		<u>-</u>	LDP. These included applications in accordance with TAN 6 (2), PPW
			11 – 3.60 (4). 1 dwelling permitted did not accord with the provisions as

Indicator	Policies	Performance	Comment
- Development in			set out in National Policy for development in the open countryside,
'Other Locations'			however of the remaining 33:
			3 TAN 6 dwellings
			6 are Discount for Sale Affordable dwellings
			5 dwellings are adjacent to a Rural Service Centre and of these 1 is
			required to provide a commuted sum on first sale or transfer.
			13 dwellings are adjacent to a Linked Settlement and of these 3 are
			Discount for Sale Affordable dwellings and 2 are required to provide a
			commuted sum on first sale or transfer.
			1 is a conversion of an outbuilding
			1 is a managers' dwelling
			1 is staff accommodation
			1 is as the result of splitting a single dwelling into 2
			1 is the conversion of a pub
			1 is the conversion of a shop

Indicator	Policies	Performance	Comment
			Training on TAN 6 with members is being undertaken and cases that
			are called in by Ministers are being reviewed and discussion is ongoing
			with members on what constitutes material planning considerations.
AMRH06 – Annual	S01, S02, S03,		The AAR was not achieved for the end of the plan however; the 2018-
Housing	S04, LU05		based projections reflect a reversal in the demographic trend compared
Completions versus			to forecast trajectories on which the LDP relied. Put quite simply, the
Anticipated Annual			growth anticipated by the 2008 forecasts has not taken place at the rate
Build Rate		0	predicted and a later forecast (2011) was accompanied by a WG letter
			to Heads of Planning to treat this lower data with caution. Going
			forward work has taken place to base this trajectory on actual
			completions to date and the revised AAR to complete this monitoring is
			208 units.
AMRH07 – Delivery	S01, S02, S03,		The percentage of anticipated units (permissions) and completions on
of Allocated Housing	S04	_	allocated sites have both increased from the previous monitoring period
Sites			to 20.7% and 9.3% respectively.

Indicator	Policies	Performance	Comment
			The LDP review will need to consider delivery of allocated sites in more detail.
AMRH08 – Housing Development in the Right Locations	S01, S03	-	Whilst the target has not been achieved, positive movement in the right direction is evident since plan adoption and since the previous monitoring period. The LDP revision will need to consider the appropriateness of existing allocated sites to inform a replacement Plan.

- 5.4 In regards to the LDP Housing indicators where concerns have been identified, this year's AMR continues to show some positive movements towards identified targets for some indicators, however the rate of progress was not as fast as anticipated and targets were not achieved by 2022. This is indicative of the over provision of housing allowance planned for given the population projections assumptions the plan was based on. When using the Anticipated Annual Rate (see AMRH06) to benchmark against the LDP is delivering in excess of the 208 units required predicated on a more reliable growth rate (2018 projections) than that used in the plan.
- 5.5 The key concerns identified by the 10th AMR relate primarily to the LDP strategy and housing supply and delivery, specifically Policies S01, S02, S03 and S04 and LU05 as they have done for a number of years. There are no simple solutions to the issues identified, as they are partially historic failures as a result of an over provision of development at start of the plan period due to flawed population projections, which are compounded by a historic backlog of unimplemented planning consents which are unlikely to come forward. In the replacement plan it will be a key priority to address these concerns, in the interim the policy team work closely with the development management service and the development management committee of Ceredigion County Council to extol the sustainable development principle and recognise areas where improvements can be made. Which has in this monitoring period included a revised member code of good practice in planning, training on Future Wales and sustainable development and an amended delegated authority procedure.
- 5.6 LDP review and revision (which has already been triggered by the 3rd AMR in 2016) when restarted will consider the following:
 - The 2018 based population and household projections and their implications for development;
 - The 2021 Census data and the implications of a declining population on Ceredigion's housing needs
 - The 2019 LHMA and the refresh update due in mid-2023

- The Settlement strategy (county-wide, at settlement group level, and development coming forward in 'linked settlements and other locations);
- The appropriateness of allocated sites specifically size and ability of local builder types to develop them; and
- The lack of housing delivery in general and in service centres/the right locations.
- How to support a more effective supply and delivery of housing (and affordable housing) across the County; and
- The delivery of existing employment allocations and the economic land supply needs into the future.
- Phosphates constraints on the Afon Teifi and other nutrient constraints as anticipated the impacts on the strategy moving forward
- Emerging themes in the SDP and shared methodologies regionally
- Emerging work on the growth deal for the Growing Mid Wales
 Partnership
- Updated and emerging evidence base.
- 5.7 The AMR includes 53 Sustainability Indicators. This year's monitoring results indicate that an overall positive effect on sustainability has been realised.
- 5.8 Finally, as we look forward it's important to recognise the housing targets in the plan are less and less meaningful, given what we know now about housing provision and population decline, compounded by the lack of deliverability due to the Phosphates issue. Thus, delivering sustainable development which is both in accordance with Future Wales and the LDP is the key priority of the LPA. However, with an eye to the future we need to be mindful it is highly likely a marine nutrient release is expected from NRW in 2023/24 and this could yield yet more restrictions on development county wide, with the entire coast of Ceredigion forming part of 3 separate SACs. So, it is with nutrient mitigations at a strategic and site-specific level we focus our attention to ensure we deliver

sustainable development as well as restoring the health of our Special Areas of Conservation.

Appendix 3 Summary of Sustainability Indicators

SA	Objective	Indicator	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
1a	Reduce greenhouse gas emissions in both existing and new	Annual emissions of basket greenhouse gases (by sector).	?	?	?	+	?	?	?	?	?	?
	development.	Ceredigion's global ecological footprint.	-	1	0	0	0	0	0	0	0	0
		The installed MW capacity of renewable energy development approved.	+	+	+	+	?	?	?	?	?	?
		Average consumption of Ordinary Domestic Electricity, Economy 7 Domestic Electricity, and Domestic Gas.	?	?	?	?	?	?	?	?	?	?

SA	Objective	Indicator	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
1b	Ensure that adequate measures are in place to adapt to climate change and to mitigate the effects of climate change.	Number of new residential developments (units and proportion) built to achieve at least Code for Sustainable Homes Level 4.	0	?	?	?	?	?	?	?	?	?
		Number of commercial or other relevant developments (units and proportion) of 1,000m2 / 1ha or over that achieve BREEAM standard excellent.	+	+	?	?	?	?	?	?	?	?
1c	To reduce flood risk.	Amount of development (units and ha) permitted in C1 and C2 floodplain areas as defined by TAN 15.	0	0	0	+	+	+	+	+	+	+

SA	Objective	Indicator	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
		Amount of new residential development (units and proportion) permitted with SuDS.	+	+	+	+	+	N/A	N/A	N/A	N/A	N/A
		Amount of new non- residential (units) development over 500m2 permitted with SuDS	+	+	+	+	+	N/A	N/A	N/A	N/A	N/A
2a	Minimise contamination and safeguard soil quality and quantity.	Amount of new development (ha) permitted on previously developed land (brownfield redevelopment and conversions) expressed as a % of all development permitted.	+	+	+	+	+	+	+	+	+	+
		Amount of new development (ha)	+	+	+	+	+	+	+	+	+	+

SA (Objective	Indicator	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
		completed on previously										
		developed land										
		(brownfield										
		redevelopment and										
		conversions) expressed										
		as a % of all development										
		completed.										
		Average density of housing development permitted on allocated development plan sites.	+	+	+	+	?	?	?	?	?	?
2b	To maintain and improve air quality across Ceredigion.	Levels of key air pollutants (e.g., NO2, PM10, Benze, ozone)	0	0	0	0	0	0	0	0	0	0
2c	Minimise the adverse effects of land-use on inland and coastal water resources quantity and quality.	Bathing water quality.	+	+	+	+	+	+	+	+	+	+

SA	Objective	Indicator	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
3a	Make sustainable use of natural resources.	Total tonnage of Municipal waste and Performance against: Local Authority Recycling Targets (LART) i.e., minimum levels to be achieved for preparing for										
		re-use and recycling/composting (or Anaerobic Digestion (AD)) in respect of municipal waste (expressed as a percentage). Target currently set at 52%.	+	+	+	+	+	+	+	+	+	+
		Performance against Landfill Allowance targets i.e., allowance limits for the tonnage of Biodegradable Municipal	+	+	+	+	+	+	+	+	+	+

SA	Objective	Indicator	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
		Waste (BMW) sent to										
		landfill. Set at 11,635

Appendix 4: Status of Allocated Sites 2022 - 2023

Housing

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H0101	Cae Rhiwgoch, Aberaeron	1.78	19	Aberaeron (Llwyncelyn)	Owner has discussed site with an RSL.
H0102	Site adj to Llwyncelyn Primary Llwyncelyn.	2.49	39	Aberaeron (Llwyncelyn)	Issues in regard to the WWTW. Improvements will form part of Welsh Water's submission to industry regulators for AMP 7 (2020 - 2025). Prior to regulatory investment this site could come forward in the short term should developers fund improvements themselves. One unit complete on part of site
H0103	Land behind Ivy Dean Llwyncelyn	2.26	41	Aberaeron (Llwyncelyn)	Local developer on-board to deliver units. Note: Launchford Developments Ltd don't own whole site. A170702 application for 9 units refused 19/09/2018. No further development

Site	Site Name	Gross Area	Units	Settlement	Status
Reference		(ha)			
H0104	Land south of Maesypentre Llwyncelyn	0.44	9	Aberaeron (Llwyncelyn)	Remainder of allocation has permission and is under construction.
H0201	Land at Stepside Farm, Gwbert Road (1)	2.76	78	Cardigan	LDP trajectory: 2013 - 2017. Site is part of a wider ongoing scheme. No other identified problems in terms of deliverability overall. Developer builds at a pace to suit his business/market and still has consents on an adjoining non allocated site. Part of site in different ownership. Preapplication consultation undertaken October 2022 Grampian conditions would be applied on any approved permission to prevent occupation until April 2027 in Cardigan

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H0202	Land at Stepside Farm, Gwbert Road (2)	1.16	33	Cardigan	LDP trajectory: 2018 - 2022. Site is part of a wider ongoing scheme. No other identified problems in terms of deliverability overall. Developer builds at a pace to suit his business/market and still has consents on an adjoining non allocated site. Grampian conditions would be applied on any approved permission to prevent occupation until April 2027 in Cardigan
H0203	Pentop Fields	0.64	19	Cardigan	Complete 2021
H0204	Adj. to Roby Villa, St Dogmaels	0.63	16	Cardigan	The site owner has been contacted regarding progress and we await further updates. Site for sale. Grampian conditions would be applied on any approved permission to prevent occupation until April 2027 in Cardigan & St Dogmaels

Site Reference	Site Name	Gross Area	Units	Settlement	Status
Reference		(ha)			
H0301	Maes Crugiau,	1.50	53	Aberystwyth/ Llanbadarn	Site Complete
	Penparcau			Fawr/ Waunfawr/	
				Penparcau	
H0302	Piercefield	3.90	118	Aberystwyth/ Llanbadarn	Full permission granted for 49 dwellings.
	Lane,			Fawr/ Waunfawr/	
	Penparcau			Penparcau	
H0303	Land adjoining	4.15	129	Aberystwyth/ Llanbadarn	LDP trajectory: 2013 - 2017. This site is
	Hafod y Waun			Fawr/ Waunfawr/	owned by the Council who Submitted
				Penparcau	alongside an RSL partner an application for
					phase 1 of the scheme, however the local
					community have submitted a Village Green
					application and the outcome of this is
					awaited before a determination on the
					planning application can be made (awaiting
					the VG application before issuing making a
					determination of the application, was a
					decision by the planning committee).

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H0304	Cefnesgair, Llanbadarn Fawr	1.45	58	Aberystwyth/ Llanbadarn Fawr/ Waunfawr/ Penparcau	A140679 – Outline application for 48 units issued 13/11/2019 A220853 Reserved Matters for 44 units approved 16/05/2023
H0305	Maesceinion, Waun Fawr	9.49	266	Aberystwyth/ Llanbadarn Fawr/ Waunfawr/ Penparcau	The site owner has been contacted regarding progress and we await further updates. Unlikely to come forward in the medium term. An application on part of the site was recently refused as piecemeal development.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
M0305 (part)	Llanbadarn Campus, Llanbadarn Fawr	10	450 Housing (See main entry in Mixed Use table below)	Aberystwyth/ Llanbadarn Fawr/ Waunfawr/ Penparcau	LDP trajectory: 2018 - 2022. This is part of a mixed-use development with the housing element of the site to come forward after the employment uses on site have been secured. Site is for sale 2023
H0306	Land at Southgate, Penparcau	5.40	189	Aberystwyth/ Llanbadarn Fawr/ Waunfawr/ Penparcau	LDP trajectory: Development to occur in 2 phases over last part of the plan period (2018 - 2022). Hydraulic restrictions exist in relation to sewage - can be addressed by private contributions. Major highway improvements required. Unlikely to come forward in the medium term.

Site	Site Name	Gross Area	Units	Settlement	Status
Reference		(ha)			
H0401	Land opposite Parc y Trap	2.69	35	Adpar	Extensive pre-application discussions have commenced with regard to bringing this site forward. Negotiations with regards to the sale of Council owned land are currently being finalised and a planning application is expected imminently. Planning application was submitted and subsequently withdrawn. Phosphate's restrictions introduced in 2021 now make this site likely undevelopable in the short term.
H0501	Former Lampeter Primary School	0.65	12	Lampeter	Site complete 2020

Site	Site Name	Gross Area	Units	Settlement	Status
Reference		(ha)			
H0502	Site rear of Ffynon Bedr	0.81	20	Lampeter	LDP trajectory: 2013 - 22: No known issues with regard to deliverability. Discussions with the site owner have indicated that development of the site will be forthcoming. Phosphate's restrictions introduced in 2021 now make this site likely undevelopable in the short term.
H0503	Site on corner of Forest Road	0.57	9	Lampeter	No known issues with regard to deliverability. Discussions with the site owner have indicated that development of the site will come forward during the plan period. Phosphate's restrictions introduced in 2021 now make this site undevelopable in the short term.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H0504	Forest Road	4.52	90	Lampeter	Discussion has commenced with regard to bringing this site forward. Phosphate's restrictions introduced in 2021 now make this site undevelopable in the short term.
H0505	Land adj Maes- yr-deri	4.20	105	Lampeter	No known issues with regard to deliverability. Extensive pre-application discussions with the site owner and agent have indicated that development of the site will be forthcoming. Pre-App Q150046 in Feb 2015. Application A190013 for 95 units refused 01/03/2019. Phosphate's restrictions introduced in 2021 now make this site undevelopable in the short term.
H0601	Rear of the Beeches	4.85	126	Llandysul	Part of site has been sold to RSL. Phosphate's restrictions introduced in 2021 now make this site undevelopable in the short term.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H0701	Land off Dewi Road	1.80	36	Tregaron	Application for 42 units approved 02/2/2016 Phosphate's restrictions introduced in 2021 now make this site undevelopable in the short term, however phosphate stripping is expected to be introduced into Tregaron WWTP in AMP 7/8 (to be confirmed) which would open up development opportunity.
H0702	Land rear to Rhyd Y Fawnog	1.52	38	Tregaron	LDP trajectory: 2018-2022. No known issues with regard to deliverability. Discussions with the site owner have indicated that development of the site will be forthcoming. Phosphate's restrictions introduced in 2021 now make this site undevelopable in the short term, however phosphate stripping is expected to be introduced into Tregaron WWTP in AMP 7/8 (to be confirmed) which would open up development opportunity.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
M0701 (part)	Cylch Caron Project, rear of Talbot	2.1	20 Housing	Tregaron	Reserved matters approval 15/03/2017 for 34 units. Planning has now expired but the project remains a strategic aim, however Phosphate's restrictions introduced in 2021 now make this site undevelopable in the short term, however phosphate stripping is expected to be introduced into Tregaron WWTP in AMP 7/8 (to be confirmed) which would open up development opportunity.
H0801	Trenchard Estate south	0.25	10	Aberporth / Parcllyn	Discussions over the site ongoing.
H0802	Trenchard Estate west	1.15	21	Aberporth / Parcllyn	Outline permission granted for 21 units A160770 extent time submission RM - to allow a further 3 years approved 09/01/2017ha. A171063 Reserved Matters approved 18/10/2023

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H0803	Maeswerdd, Lon Ysgolig	0.79	15	Aberporth / Parcllyn	LDP trajectory: 2013-2017. The planning permission granted under the UDP which covered part of the allocation has expired. Landowner contacted by LPA to encourage release of the site. Site has been up for sale.
H0804	Field next to Brynglas Estate	1.57	52	Aberporth / Parcllyn	LDP trajectory: 2018 - 2022. No clear indication that the developer is committed to early development of this site, therefore delivery is not anticipated in the short term.
H0805	Land at Plas Newydd South east off Parc Y Delyn	0.99	25	Aberporth / Parcllyn	LDP trajectory: 2018 - 2022 Issues in regard to the WWTW which will need to be addressed by private contributions. Access would require demolitions and site is actively farmed at present. Unlikely to come forward in the medium term.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
M0802	Sports and social club and playing fields	3.90	48 Housing (See main entry in Mixed Use table below)	Aberporth / Parcllyn	LDP trajectory: 2018 - 2022 Proposal involves a relatively complex negotiation to provide alternative sports/club facilities for which negotiations well advanced. Application currently submitted for part of this site, not yet determined. A220476 Full Planning permission for the demolition of the vacant facilities and 43 units granted 06/04/2023
H0901	Land adjacent to Erw Las	1.85	56	Bow Street	LDP trajectory: 2018 - 2022.
H0902	Land adjacent to Ysgol Gynradd Rhydypennau	0.87	22	Bow Street	LDP trajectory: 2013 - 2017. Development expected in the short-term following extensive discussions with RSL.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H1001	Land rear of	6.98	134	New Quay	Application A181235 for 35 refused
	Towyn Farm				30/09/2020. Further discussions ongoing.
H1101	Land off Spring Meadow Estate	0.37	7	Cenarth	Site Complete 2021
H1102	Land at and n/	0.86	14	Cenarth	Discussion has commenced with regard to
	east of Tegfan				bringing this site forward. Phosphate's
					restrictions introduced in 2021 now make
					this site undevelopable in the short term.
H1103	North east	0.79	17	Cenarth	LDP trajectory: 2013 - 17. Site forms an
	Cenarth School				extension to an existing development site.
					The landowner/developer has released the
					previous site on a piecemeal basis gradually
					over recent years, but policy now seeking
					better progress. Phosphate's restrictions
					introduced in 2021 now make this site
					undevelopable in the short term.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H1201	Site rear to Bryn Salem	0.54	10	Felinfach/Ystrad Aeron	All 23 units completed in 2016.
H1202	Cae'r Bont	8.22	90	Felinfach/Ystrad Aeron	No further discussion with regard to bringing this site forward has been held. Unlikely to come forward in the medium term.
H1203	Land off B4342	1.57	24	Felinfach/Ystrad Aeron	A181211 - Erection of 9 dwellings (2 affordable) approved 19/08/2020 and under construction 2021.
H1301	Land rear of Brynawen	1.08	22	Llanarth	9 dwellings under construction started 2022. Permission granted for further 26 units.
H1302	Land adj to Vicarage	0.83	9	Llanarth	Reserved Matters permission for 9 dwellings of which 4 are to be affordable properties, granted 29/01/2015.
H1303	Land adj to Allt Y Bryn	0.84	5	Llanarth	No known issues regarding deliverability.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H1304	Alma Street	2.64	32	Llanarth	Discussion has commenced with regard to bringing this site forward. Outline Planning Application is imminent. Likely to deliver in the next 5 years.
H1401	Land Opposite Y Gorlan	3.34	84	Llanilar	LDP trajectory: 2013 - 2017 (42 units) & 2018 - 2022 (42 units) Rate of development of existing consents in the settlement to be acceptable in terms of timing before this site is released.
H1501	Land rear or Pont Pen-lon	1.30	20	Llanon	LDP trajectory: 2013-2017 (10 units) & 2018 - 2022 (10 units) Hydraulic restrictions exist in relation to WwTW at Llanrhystud - improvements to Sewage Pumping Stn Llanon would ensure same pass forward flow rate is maintained.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H1502	Stad craig Ddu.	2.46	37	Llanon	2 Plots remaining on the original application. Application for 37 dwellings on final part of the site approved 08/09/2020. Site almost complete 2023
H1503	Land rear of Cylch Peris	1.39	28	Llanon	A190018 Residential development of 34 units (including 10 affordable housing units) approved 10/03/2020 Site Complete 2023
H1601	Clos Alltfach	1.48	37	Llanrhystud	Hydraulic restrictions exist in relation to WwTW due to the extent of development in whole settlement. Issues in regard to WwTW. Improvements will form part of Welsh Water's submission to industry regulators for AMP 7 (2020 - 2025). Prior to regulatory investment this site could come forward in the short term should developers fund improvements themselves. The adjoining site is almost complete 2023.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H1602	Pentref Uchaf	0.86	22	Llanrhystud	Hydraulic restrictions exist in relation to WwTW due to the extent of development in whole settlement. Improvements will form part of Welsh Water's submission to industry regulators for AMP 7 (2020 - 2025). Prior to regulatory investment this site could come forward in the short term should developers fund improvements themselves.
H1801	Land adjacent to Y Gelli	2.95	64	Penrhyncoch	Outline planning application approved 27/07/2015 (A130975). First 26 units either complete or under construction. And permission A180670 issued 11/04/2019 for 27 units (plots 27 – 53) all of which are under construction 2021. Reserved matters application A200562 – 23 units approved 22/10/2020 and construction started.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H1901	Land adjacent to Heol Elennydd	2.87	37	Devil's Bridge	LDP trajectory: 2013 - 2017 & 2018 - 2022 Hydraulic restrictions exist in relation to WwTW due to the extent of development in whole settlement. Issues may have to be addressed through AMP8 bid, if successful, occur 2015-22.
H1902	Land adjacent to Pendre	0.67	9	Devil's Bridge	2018 - Erection 11 dwellings and associated works, approved 04/08/2020. Reserved matters application approved 2022. Construction ongoing 2023
H2001	Dolwerdd	1.76	44	Pontrhydfendigaid	The site owner has been contacted regarding progress and we await further updates. Unlikely to come forward in the medium term.
H2002	Land Adjacent to Rock House	0.77	19	Pontrhydfendigaid	LDP trajectory: 2013 - 2017 Unlikely to come forward.

Site Reference	Site Name	Gross Area (ha)	Units	Settlement	Status
H2101	Y Dderwen	0.84	10	Talybont	Outline permission granted subject to signing of Section 106 agreements. Disposed of Art.25(11)a 30/03/2016
